I. Executive Summary

Introduction

The Massachusetts Cannabis Control Commission (hereafter referred to as “the Commission”) is legislatively required to develop “procedures and policies to promote and encourage full participation in the regulated cannabis industry by people from communities that have previously been disproportionately harmed by cannabis prohibition and enforcement and to positively impact those communities” (G. L. c. 94G, § 4 (a ½) (iv)). Accordingly, the purpose of this project was to: (1) develop a method to empirically assess the extent to which Massachusetts communities have been impacted historically by cannabis prohibition and the “War on Drugs;”^a (2) apply the method to generate a “disproportionate impact score” (“DI” score) that reflects those impacts for different areas of Massachusetts; and (3) provide a ranking of areas in Massachusetts according to the disproportionate impact score [See *Section III. Methods*].

Approach

Overview. To quantify the impact of cannabis prohibition and the “War on Drugs^a,” it was necessary to first conceptualize how this could be measured using available data. Prior research demonstrates that enforcement of drug prohibition has resulted in disproportionately high numbers of arrests and incarceration for Black and Latino^b individuals.¹ These disparities persist despite cannabis decriminalization in Massachusetts in 2008, medical legalization in 2012, and adult-use legalization in 2016.² There are strong correlations between poverty and involvement in drug selling and/or drug use; and after incarceration, many individuals face steep challenges to gaining legal employment, which can set up cycles of poverty that last generations.³ The disproportionate impact (DI) score, therefore, included four primary factors at a geographic-level: Drug arrests, including: (1) average annual number of drug arrests; and (2) average annual rate of drug arrests per 100,000 population; (3) percent of people living in poverty (“economic deprivation”); and (4) the percent of residents who report Black and/or Latino race/ethnicity (“racial and ethnic composition”). These factors were examined for 295 municipalities across Massachusetts, as well as for 305 census tracts in the state’s five largest cities (Boston, Cambridge, Lowell, Springfield, and Worcester).

Data Sources. Arrest data for all incidents involving a drug crime were obtained from the National Incident-Based Reporting System (NIBRS) and the Boston Police Department (BPD) from January 1, 2000 through December 31, 2017 [See *Section II. Introduction—Massachusetts*

^aThe “War on Drugs” refers to punitive criminal sanctions for drug offenses and use of a harsh criminal justice approach in managing societal problems with drugs in the United States [See *Section II. Introduction. History of Drug Enforcement* for additional discussion and references].

^bRace and ethnicity data analyzed in this report come from the U.S. Census Bureau. The Census asks individuals if they are “Hispanic or Latino.” Hispanic or Latino individuals may be of any race. The term Latino is used in this report to refer to people who identify as Hispanic or Latino/a/x. The term Black is used to refer to individuals who identify as either “Black or African American” on the census and who do not identify as Hispanic or Latino.

Policy for additional information on NIBRS vs. the previously used Uniform Crime Reporting (UCR) data]. Arrests were assigned to the census tract in which they occurred. The year 2000 was selected as the starting point for this analysis as this was the first year that most Massachusetts municipalities reported to NIBRS [See Figure VI-1]. The ending year was selected so that the study assessed the time before Massachusetts implemented legal sales of cannabis for adult use. Municipalities (n=56) that did not have drug arrest data available in NIBRS or from BPD could not be included in the analysis [See: *Section III. Methods. Data Sources and Time Frame* for more detail].

Score Development. Four key indicators were used in an equation^c that assigned a disproportionate impact (DI) score to each area. Municipalities and/or census tracts were scored separately. These indicators were calculated at the area level and included: (1) average annual number of drug arrests; (2) average annual rate of drug arrests per 100,000 population; (3) percent of people living in poverty; and (4) the percent of residents who report Black and/or Latino race/ethnicity.

To account for the fact that some areas have consistently high levels of arrests, poverty, and Black and/or Latino residents over time while other areas have experienced more changes in these indicators, the study period was divided into four time spans.^d The scoring equation was applied to generate a DI^e score and a ranking for each place in each time span. The average of the four rankings^e was calculated to create a final DI score. The final DI scores range from zero to 99.52, with higher scores representing higher impacts. This final DI score was again ranked to identify the most disproportionately impacted areas in Massachusetts according to the score. Municipalities with a high concentration of college students (n=5) or of seasonal housing (n=7) were excluded from the final ranking because the population and arrest data for such areas is unlikely to represent year-round residents. [See *Table VI-2*]. The five largest cities were excluded from the municipality rankings because they are analyzed separately at the census tract level.

Results

There were 279 municipalities included in the municipal-level ranking. Table I-1 below splits the areas with the highest DI scores into two tiers. Tier 1 includes the 28 cities and towns in the top 10 percent of DI scores (range: 78.7 to 99.5). The three highest scoring communities were Holyoke, New Bedford, and Brockton. Tier 2 includes the next 28 municipalities which fell into the top 11-20 percent of DI scores (range: 69.6-78.6). Tier 2 includes places such as Weymouth, Dennis, and Methuen. Each tier after that contains approximately 56 areas that represent 20

^cThe DI scores in this analysis were calculated using rankings for the following measures and in the following equation: $(0.5) * \text{Average Annual Number of Drug Arrests} + \text{Average Annual Rate of Drug Arrests per 100,000 population} + (0.5) * \text{Percent of people living in poverty} + (0.5) * \text{Percent of Black and/or Latino residents}$.

^dThe time spans used for the analysis were: 2000-2004, 2005-2009, 2010-2014, and 2015-2017.

^eDI scores and ranking for each time period were based on the number of municipalities or census tracts reporting arrest data, which varied over time, from n=246 in 2000-2004 to n=295 in 2015-2017. These ranking were converted to percentages before being averaged across the time spans in which an area reported drug arrests.

percent of ranked municipalities. Tier 6 can be thought of as those communities least negatively impacted by drug enforcement and the bottom 20 percent of DI scores (range: 6.2-30.1).

The median traits in 2015-2017 for a municipality in Tier 1 (the top 10 percent) include: 88 average (mean) annual arrests, 308 average annual arrests per 100,000 population, 15 percent living below the federal poverty line, and 23 percent Black and/or Latino residents. The median municipality in Tier 2 (with a score in the 11th to 20th percentile) had: 50 average annual arrests, 226 average annual arrests per 100,000 population, eight percent living below the federal poverty line, and six percent Black and/or Latino residents. By comparison, municipalities in the bottom tier had two average annual arrests, 32 average annual arrests per 100,000 population, four percent living below the federal poverty line, and two percent Black and/or Latino residents.

The DI score tiers for 305 census tracts within the five largest cities are presented in Figure I-1. Boston, Springfield, and Worcester had census tracts that fall within the Tier 1 on the DI score.

Conclusion

This analysis identifies Massachusetts municipalities and specific census tracts within the five largest cities that have experienced high levels of drug arrests, compounded by poverty and racial segregation, and thus disproportionately experienced negative impacts from drug prohibition and enforcement. The areas in the top tiers on both the municipality and census tract rankings are the most disproportionately impacted areas. Because the DI score for each area is calculated using rankings that are relative to other areas in Massachusetts, places further down on the list may have been impacted, but to a lesser degree.

It is notable, if not surprising, that a majority of municipalities on the current list of Disproportionately Impacted Areas^f maintained by the Commission⁴ fall into Tiers 1 and 2 based on the DI score created in this analysis. Further, many municipalities in Tier 1 are legislatively recognized on the state level as “Gateway Cities.” Gateway Cities are midsized urban centers that serve as regional economic anchors and face a variety of social and economic challenges.⁵

Given the nature of the DI scores (*i.e., communities with higher scores are “more impacted” than communities with lower scores*), it may be appropriate for the Commission to consider using different strategies to attempt to address and ameliorate the impacts of drug enforcement on areas in different tiers (or other groupings of areas) on this list. Such an approach would reflect the reality that in Tier 1, residents are more likely to have experienced negative impacts from drug enforcement; whereas in lower tiers, it is most likely to be a subset of people who have such experiences. Eligibility for priority license status and other benefits could be based on a combination of requirements such as residence in a Tier 2 Disproportionately Impacted Area (DIA) and membership in an additional priority group (*e.g., personal or family history of drug arrest or incarceration; Black race and/or Latino ethnicity*).

^f The Commission has previously referred to areas disproportionately impacted by drug prohibition as “Areas of Disproportionate Impact” or “ADIs.” Since the abbreviation ADI is also used in several fields to refer to a measure of economic deprivation called the Area Deprivation Index (ADI), this report utilizes the term Disproportionately Impacted Areas and the abbreviation DIA. See Section II: Introduction, *Massachusetts Policy* for more detail.

It should be noted that disproportionate impacts of drug enforcement occur alongside and interact with other economic and social problems (e.g., *slow job growth and poor-quality schools*). With that, thoughtful and strategic utilization of the DI score for policymaking can help improve social equity within the cannabis industry, and hopefully, in communities that have long-faced social and economic challenges in the Commonwealth.

Table I-1. Municipalities in Tiers 1 and 2 (Top 20 Percent) of Disproportionate Impact Score

Tier 1		Tier 2	
Rank	Municipality	Rank	Municipality
1	Holyoke*	29	Weymouth
2	New Bedford*	30	Dennis
3	Brockton*	31	Methuen

27	North Adams*	55	Agawam
28	Falmouth	56	Truro

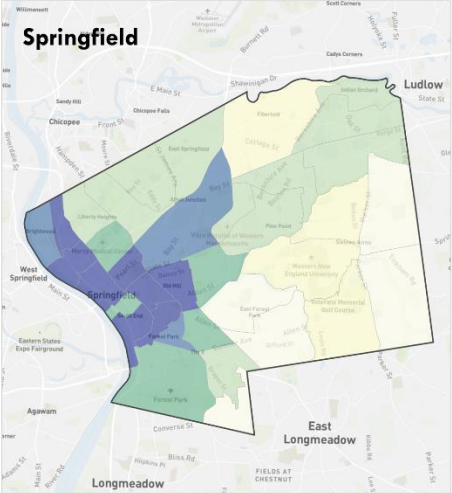

Note: See Table VI-7 for full list of rankings and scores. Disproportionate impact scores ranged from 78.67-99.52 in Tier 1 (top 10%) and 69.56-78.66 (top 11% to 20%) in Tier 2. Tiers were created for 279 cities and towns, after excluding the five largest cities and 9 other municipalities with high student enrollment or seasonality [See Table VI-2 for exclusions].

Municipalities with an asterisk (*) denote those that were included on the Commission’s 2017 list of Disproportionately Impacted Areas (DIAs).⁴

Figure I-1. Disproportionate Impact Tiers for Census Tract in Massachusetts' Five Largest Cities

Disproportionate Impact Tier (Score Range)

- Tier 1 (83.2 - 94.8)
- Tier 2 (74.8 - 83.1)
- Tier 3 (54.6 - 74.7)
- Tier 4 (41.2 - 54.5)
- Tier 5 (23.9 - 41.1)
- Tier 6 (5.8 - 23.8)
- Student population > 50%

Note: Further detail on census tracts (and alignment with neighborhoods for Boston only) can be found in *Table IV-2* and *Figures IV-2* through *IV-6*.

See *Appendix II. Data. Table VI-7* for DI scores and components for all Massachusetts Municipalities, 2000-2017.

II. Introduction

Purpose

The Commission is legislatively required to develop “procedures and policies to promote and encourage full participation in the regulated cannabis industry by people from communities that have previously been disproportionately harmed by cannabis prohibition and enforcement and to positively impact those communities” (G. L. c. 94G, § 4 (a ½) (iv)). Accordingly, the purpose of this project was to: (1) Develop a method to empirically assess the extent to which Massachusetts communities have been impacted historically by cannabis prohibition and the “War on Drugs;”^a (2) apply the method to generate a “disproportionate impact score” (“DI” score) that reflects those different impacts for different areas of Massachusetts; and (3) provide a ranking of areas in Massachusetts according to the disproportionate impact (DI) score. [See *Section III. Methods*].

History of Drug Enforcement

In the 1960s, there was growing public recognition that alcohol and drug use had become a substantial problem in the United States (U.S.). As part of the 91st U.S. Congress’ Title II of the Comprehensive Drug Abuse Prevention and Control Act of 1970, Congress passed the Controlled Substances Act and President Nixon signed it into law. This statute ushered in a new approach to regulating substances and setting a framework for drug offenses. It created five drug schedules with the designations designed to be made after scientific review of the abuse liability and potential for medical use.^{6,7} While Schedule 5 drugs have low addictive potential and established medical uses, Schedule 1 drugs are those considered to have no accepted medical uses and high potential for dependency. Cannabis was designated as a Schedule 1 drug placing it “among the most dangerous drugs, with no medical use and high potential for abuse.” Although this Federal Schedule 1 designation was controversial at the time and continues to be contested, it remains in place.^{8,9}

In June of 1971, Nixon officially declared a “War on Drugs.” This campaign aimed to stop illegal drug use and distribution, but had adverse effects on communities of color (“disproportionate impact”). The campaign increased funding for drug-control agencies and created a mandatory prison sentencing for drug crimes. This prison reform led to a disproportionate incarceration rate of people of color for drugs crimes. Many believe this was the intended effect of the “War on Drugs.”

In the 1980s, President Reagan leaned into the Nixon era drug policies and took on a “Law and Order” approach to the nation’s perceived drug problem. The Anti-Drug Abuse Acts of 1986 and 1988 established punitive criminal sanctions for drug charges including new mandatory minimum sentences for offenses related to most drugs, including cannabis. During the Reagan Administration, drug users were targeted by law enforcement via drug possession charges. Drug

control practices targeted Black men in low-income, urban areas leading to a dramatic increase (“disproportionate impact”) in the proportion of Black people under correctional control. While some “War on Drugs” and “Law and Order” policies have been discontinued, they have affected many systems and social structures in the U.S., leaving a legacy of impacts that persist through the present day.¹

Massachusetts Policy

Massachusetts instituted cannabis decriminalization in January 2009. Although the number of arrests for cannabis possession dropped precipitously in subsequent years, racial disparities in cannabis possession arrests persisted.² The Massachusetts legislature legalized cannabis for medical use in 2012 and dispensaries first opened in 2015. Further, Massachusetts legalized cannabis for adult use in late 2016 and the regulated retail market became operational in Fall 2018. Despite these policy changes, data shows that law enforcement patrol urban minority neighborhoods more aggressively than suburban areas, where fewer people of color reside.¹⁰ People of color, and Black males in particular, experience disproportionate law enforcement contact, arrests, and incarcerations related to drug offenses.¹¹

As part of its mandate to address the harms from cannabis prohibition, the Commission provides certain benefits to geographic communities (“areas”) designated as disproportionately impacted (DIAs). For example, under current regulations, individuals who have resided for five of the past 10 years within a DIA are eligible for certain benefits, such as participation in the skill-based Social Equity Program from the Commission. Additionally, Positive Impact Plans developed by cannabis businesses can seek to invest resources in areas on the DIA list.

A prior study for the Commission led by Dr. Gettman analyzed arrest rates in relation to population size, percent of families below the poverty line, and employment rates, and used these indicators to establish a ranking for 160 municipalities in Massachusetts and census tracts in Boston, Worcester, Springfield, and Lowell using Uniform Crime Reporting (UCR) data.⁴ This study informed the Commission’s original DIA list. The current study sought to expand the analysis of DIAs to include most of the 351 cities and towns in Massachusetts, and a census tract analysis for all of the cities with over 100,000 residents in the state, and to use additional drug arrest and sociodemographic data. The present study further extends the previous analysis through its use of a more comprehensive law enforcement dataset (*i.e.*, *National Incident-Based Reporting System [NIBRS] vs. Uniform Crime Reporting*) and creates a new, empirical approach to identifying communities most impacted by drug enforcement.

III. Methods

Overview

Drawing on prior research, the study team developed a method to quantify the impact of the “War on Drugs” on geographic areas in Massachusetts using arrest, socioeconomic, and demographic data. Critical to this analysis was identifying data that was available at a fine-enough geographic scale to allow analysis at the municipal (*i.e., city or town*) level and at the census tract level for the largest cities.

The methodological approach was based on well-established data attesting that arrest and incarceration have negative impacts on individual health, social, and financial well-being, as well as adverse effects for families and communities.³ Additionally, enforcement of drug prohibition has resulted in disproportionately high numbers of arrest and incarceration for Black and Latino individuals.¹ These disparities persist despite the Commonwealth’s changing cannabis policies, including cannabis decriminalization, followed by medicinal and adult-use legalization.² Because of this situation, it was important to account for the fact that Black and Latino persons experience race-based disparities in drug-related stops, searches, and arrests in the methodology. Further, regardless of race, there are strong correlations between poverty and involvement in drug selling and/or drug use, and after incarceration, many individuals face steep challenges to gain legal employment which can establish cycles of poverty that last generations.³ Taking these factors into account, the disproportionate impact (DI) score was based on a four-pronged approach that measured: (1) average annual number of drug arrests; (2) average annual rate of drug arrests per 100,000 population; (3) percent of people living in poverty; and (4) the percent of residents who report Black and/or Latino race/ethnicity. These three abovementioned factors were examined for 295 municipalities across Massachusetts as well as for the 305 census tracts in the state’s five largest cities (Boston, Cambridge, Lowell, Springfield, and Worcester).

The locations with the highest DI scores are the most disproportionately impacted by drug policy enforcement. These represent areas where the average annual number of drug arrests and rate of drug arrests per 100,000 persons are the highest, and the impact of these arrests likely compounded by high levels of poverty and larger proportions of Black and Latino residents. Conversely, the lowest scoring areas were places with low levels of arrests, low poverty, and a smaller proportion of Black and Latino residents. These can be thought of as areas that have experienced fewer negative impacts from drug enforcement.[§]

[§]It is important to reinforce that the DI scores in this study are relative to other areas in Massachusetts. A low DI score does not indicate that the area or the people residing in that area have experienced no impact from drug enforcement and the other measures that went into the DI score measure.

Data Sources and Time Frame

Drug arrest data from the NIBRS¹² were obtained from the Massachusetts Executive Office of Public Safety and Security (EOPSS). Starting in the 1980s, the Federal Bureau of Investigation (FBI) began implementing the NIBRS program in law enforcement agencies across the U.S. This program requires participating law enforcement agencies to collect incident-level data on offenses reported to the police. In Massachusetts, law enforcement agencies serving municipalities submit these data points to a state repository and the state repository submits the data to the FBI. It is a voluntary reporting program and adoption among law enforcement agencies has been slow.

The overall study period was 2000-2017. By the end of 2000, over half of Massachusetts municipalities (n=183) reported to NIBRS, making 2000 an adequate starting point for the study. The ending year of 2017 was selected to have a “baseline” DI score before Massachusetts implemented legal sales of cannabis for adult use. As of 2017, there were 55 Massachusetts towns that did not contribute to NIBRS¹² and thus could not be included in this analysis [See *Table VI-2*]. In general, these are small municipalities with a population size under 8,000 residents, but there is one notable exception: the city of Lawrence (pop. 80,028). Lawrence is a large Gateway City⁵ with significant economic challenges (11 percent unemployed and 24 percent under the poverty line in 2017), with over 80 percent of the population of Latino ethnicity. One municipality had zero recorded drug arrests during the study period and was also not included. The city of Boston did not report to NIBRS during the study period, thus, data for Boston were procured separately from the Boston Police Department (BPD).

To identify areas that consistently had high DI scores according to our measure, acknowledge variation in arrests, demographic, and socioeconomic patterns over time, and reduce the influence of outliers, the 18-year period was broken into smaller time spans. Three five-year spans (2000-2004, 2005-2009, and 2010-2014) were used and the last time span covered three years (2015-2017).

For demographic and socioeconomic data, the current research leveraged the U.S. Census Bureau’s Decennial Census and American Community Survey (ACS), specifically the 2000 Census, and two ACS five-year databases. The ACS is an annual, sample-based survey of American households. The five-year version of the ACS pools together responses from five years of these surveys to create estimates. The five-year version of the ACS is preferable to the one-year version for this study because the pooled sample size allows for data to be released for all cities and towns in the Commonwealth. One-year ACS data are only released for cities and towns with populations of 65,000 or more, which would have severely limited the number of communities that could be analyzed for this study. Appendix Table VI-1 shows the study time spans for arrest data and the year(s) of the corresponding Census and/or ACS data used for analysis.

Municipalities and Census Tracts

All municipalities in Massachusetts with available drug arrest data were included in our analysis. Municipalities were defined according to the U.S. Census Bureau’s city/town areas (CTA) designations. Larger cities can often be very complex, with wide variability in racial and socioeconomic composition and in law enforcement activity from neighborhood-to-neighborhood. This analysis, therefore, assessed trends at a census tract level for the five cities in the state with over 100,000 residents (Boston, Cambridge, Lowell, Springfield, and Worcester). Thus, the geographic areas in our analysis include both municipalities and census tracts within the five largest municipalities. Law enforcement agency data and population data was linked to the geographic area, either at the municipality or census tract level.

Variables

- *Number of drug-related arrests:* Average (mean) annual counts of drug-related arrests were computed using NIRBS and BPD data. This included all incidents when a drug offense was involved. This was calculated for each distinct geographic unit (*i.e., city/town or census tract*) based on the number of months that the area reported to NIBRS in each analytical period and then multiplied to represent an annual count. For example, if a town began reporting to NIBRS in January of 2001, the total number of arrests for that area in the period 2000 to 2004 would be divided by 48 months rather than 60 months (*i.e., five years*) and multiplied by 12. This approach allowed comparability across areas that started reporting to NIBRS at different times.
- *Rate of drug-related arrests per 100,000 residents:* The average annual count of drug arrests within an area was divided by the number of adult residents in that area to create a rate per 100,000 population.
- *Percent of Black^h and/or Latinoⁱ residents:* The U.S. Census and ACS data provide estimates of the population demographic composition with the following racial categories: Black or African American, white, American Indian or Alaska Native (AI/AN), Asian, Native Hawaiian or Other Pacific Islander. Ethnicity categories are Hispanic or Latino or non-Hispanic or Latino. The study assessed the proportion of residents in each area that fall into these categories and calculated the share of adults over age 18 who are Black and/or Latino.
- *Poverty status:* Poverty was measured by the percent of persons below the federal poverty level within a geographic unit (*e.g., city/town, census tract, etc.*).

^hThe term Black is used to report non-Hispanic or Latino persons who identify as either “Black or African American.”

ⁱThe term Latino is used in this report to refer to people who identify as Hispanic or Latino/a/x. Ethnicity data analyzed in this report comes from the U.S. Census Bureau which asks individuals if they are “Hispanic or Latino.” Hispanic or Latino individuals may be of any race.

Data Exclusions

This analysis sought to draw conclusions about the people who reside in a certain place being disproportionately impacted by drug policy enforcement. The arrest data obtained from NIBRS and BPD contained addresses for arrests and, due to privacy reasons, did not contain information about the residential address for arrested individuals. It is therefore necessary to assume that the arrest data reflects arrests of residents of a particular area, rather than people moving through that area. To improve the validity of this assumption, arrests (n=5,042) that occurred at certain locations that were unlikely to represent residents were excluded [See *Table VI-4*]. Arrests that met one of the following geographic criteria were excluded:

- 1) Arrest occurred in a census tract that does not reflect a residential area: parks (*e.g., Boston Common*), water (*e.g., Boston Harbor*), other tracts with fewer than 1,000 residents (*e.g., Suffolk Downs and Irving Oil industrial area*);
- 2) Arrest occurred at a geographic point (*i.e., addresses*) within the five largest cities that likely does not reflect a residential location. Specifically, arrests recorded at: the address of police headquarters (HQ) or substations, major transit hubs (*e.g., at the exact address of South Station*), five specific “suspected drug use/trafficking hubs” without residents (*e.g., Xfinity Center in Mansfield, South Shore Plaza Mall in Braintree*) that accounted for more than 20% of a municipality’s total arrest count;
- 3) Arrests from the five largest cities for which the address could not be mapped to a unique point (*e.g., due to a street name that does not exist*); and
- 4) Arrests that from the five largest cities for which the address, when mapped, was outside of the agency’s jurisdiction (*e.g., an arrest made by the Springfield Police Department in Chicopee*).

Special Considerations

Places with high numbers of undergraduate and graduate students

In communities with large student populations, typically college and university towns, the poverty rate can be inflated, thus, not be an accurate measure of economic deprivation in an area. For example, between 2015 and 2017, the town of Amherst had the highest poverty rate in Massachusetts at 33 percent. Comparatively, the poverty rates of cities such as Springfield and Holyoke were just below 30 percent in that same period. While the poverty rate is similar between these communities, the economic realities of these places are quite different. To account for this, the study examined the percentage of residents for each geographic area that were enrolled in college (undergraduate or graduate), with the aim of separating permanent resident poverty from student-driven poverty. Similarly, places with a high concentration of students may also be subject to higher levels of non-resident arrests. A place was defined as having a high number of students if enrolled students made up 20 percent of the population in a municipality or 50 percent of the population of a census tract, based on data for the latest time span. Areas that fit the criteria (five municipalities and 15 census tracts) were identified and omitted from the final rankings [See *Table VI-2* for list of excluded municipalities and *Table VI-3* for a list of excluded census tracts].

Seasonal housing

Areas with high concentrations of seasonal housing and high levels of seasonal arrests were also identified and removed from the final rankings (n=7) [See *Table VI-2*]. This was done to account for communities that may have seasonal spikes in non-resident arrests. Places with high levels of seasonal housing were defined as those with 25 percent or more of the housing stock as seasonal (based on the percentage of vacant housing units used for seasonal, recreational, or occasional use) and where 40 percent or more of arrests were in one specific season (winter; spring; summer or fall) across the study period. As an example, two towns excluded from rankings via this method were Nantucket and Provincetown.

Scoring

The four variables listed above were calculated for all areas with arrest data within a specific time span, treating municipalities and census tracts separately. Next, the areas were ranked according to each measure, separately, with higher values reflecting more impacted areas. The rankings were then combined using the following equation in order to generate a DI score for each time period:

$(0.5) * \text{average annual number of drug arrests} + \text{average annual rate of drug arrests per 100,000 population} + (0.5) * \text{percent of people living in poverty} + (0.5) * \text{percent of residents who are Black and/or Latino}.$

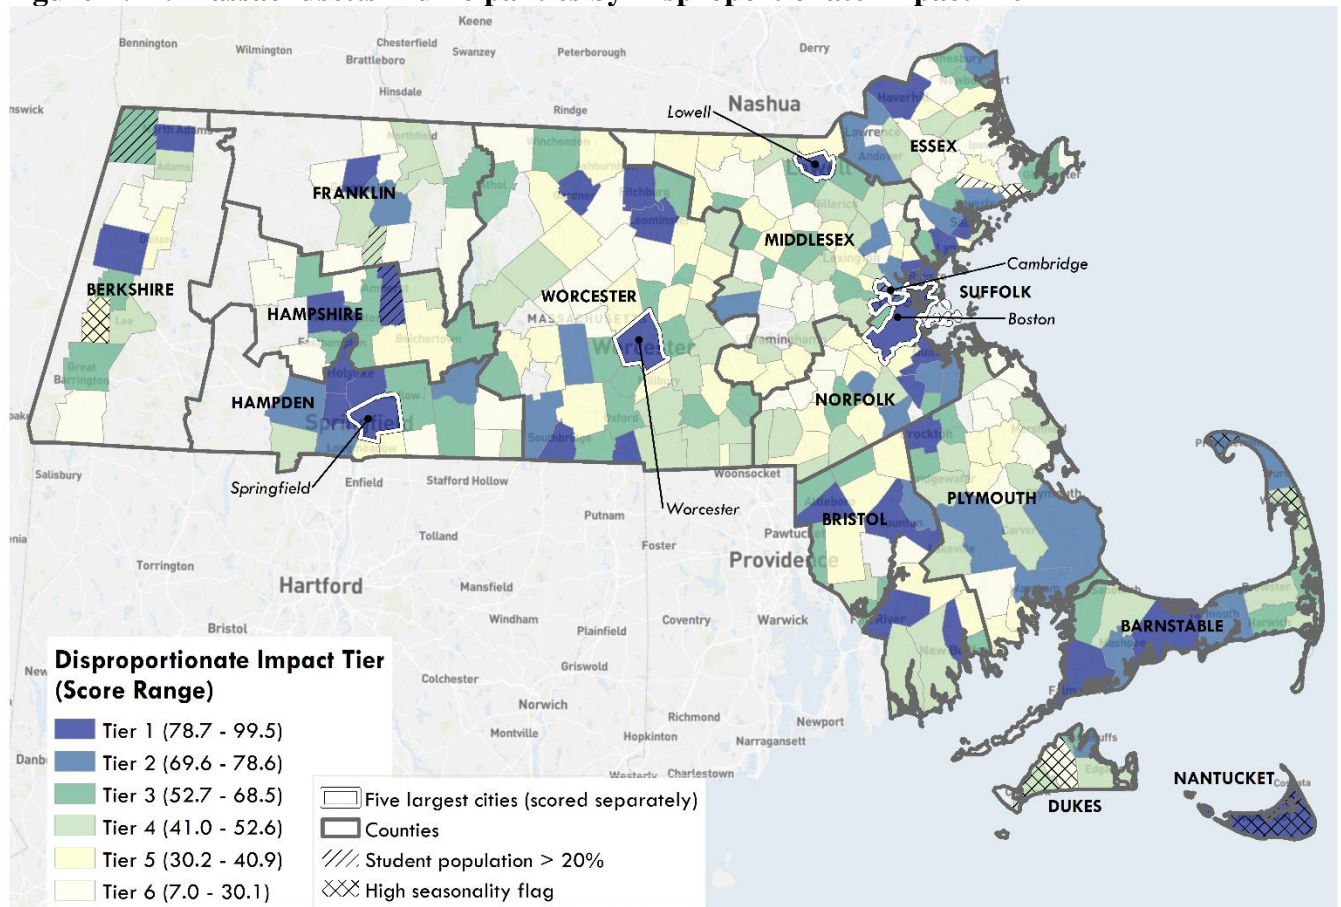

The DI scores for each time span were converted to a percentile and averaged together across the time spans with arrest data to compile the final score.

IV. Results

Municipality Rankings

This analysis shows that there are communities that have been heavily impacted by drug policing all around the Commonwealth [See *Figure IV-1*]. Table IV-1 shows a list of the municipalities that fell within the top 20 percent of highest scores on the disproportionate impact score measure. Tier 1 represents the 28 communities in the top 10 percent and Tier 2 represents the areas that comprised the upper 11 to 20 percent. Excluding the five largest cities in Massachusetts, the municipalities that ranked the highest on the DI score were Holyoke, New Bedford, and Brockton. The cities of Boston, Cambridge, Lowell, Springfield, and Worcester all have DI scores that would fall within the upper 20 percent, but they have been removed from this list since they were analyzed separately at the census tract level.

Figure IV-1. Massachusetts Municipalities by Disproportionate Impact Tier

Note: See *Appendix II. Data. Table VI-7* for DI scores and components for all Massachusetts Municipalities, 2000-2017 and *Appendix II. Data. Table VI-8* for DI scores and components for all Census Tracts of large Massachusetts cities, 2000-2017.

Note: DI=Disproportionate impact. *Indicates Massachusetts legislature-defined Gateway City. Ten places with significant seasonal housing/arrests or 20% or more residents in undergraduate or graduate degree programs have been grayed out and italicized, as have the state's five largest cities. Tiers were created with these places excluded, and therefore reflect percentiles of 279 total cities and towns.

See *Appendix II. Data. Table VI-7* for DI scores and components for all Massachusetts Municipalities, 2000-2017 and *Appendix II. Data. Table VI-8* for DI scores and components for all Census Tracts of large Massachusetts cities, 2000-20017.

The median traits in 2015-2017 for a municipality in Tier 1 (the top 10 percent) include: 88 average (mean) annual arrests, 308 average annual arrests per 100,000 population, 15 percent living below the federal poverty line, and 23 percent Black and/or Latino residents. The median municipality in Tier 2 (with a score in the 11th to 20th percentile) had: 50 average annual arrests, 226 average annual arrests per 100,000 population, eight percent living below the federal poverty line, and six percent Black and/or Latino residents. By comparison, municipalities in the bottom Tier had two average annual arrests, 32 average annual arrests per 100,000 population, four percent living below the federal poverty line, and two percent Black and/or Latino residents.

Census Tract Rankings

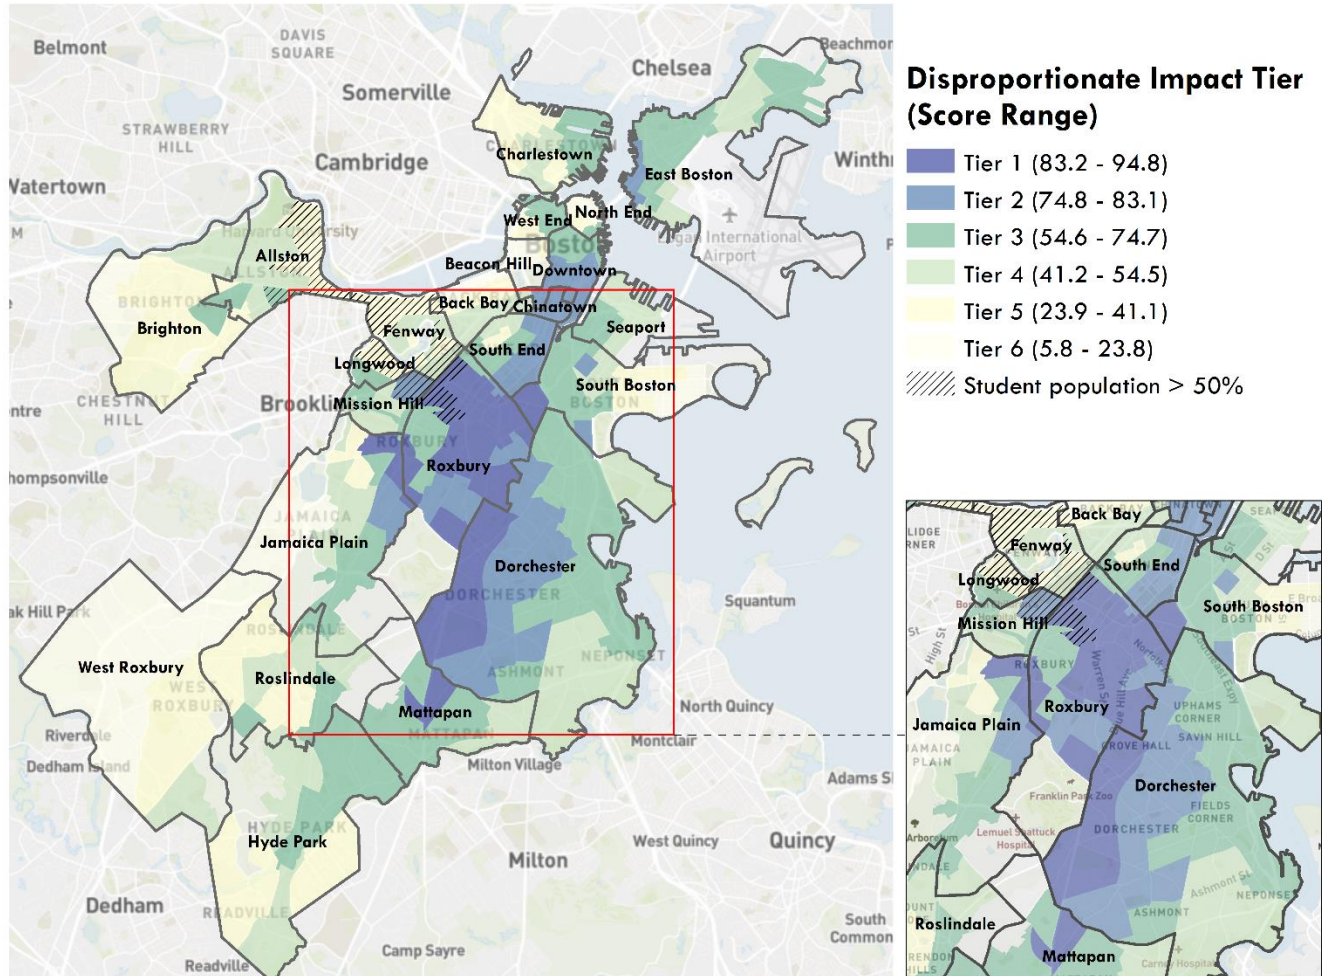

Six tiers that reflect the top 10 percent (Tier 1), top 11 to 20 percent (Tier 2), and 20 percent subsequent groupings were constructed based on the DI score distribution of all 305 census tracts across the state's five largest cities. The areas flagged for having high student enrollment were excluded from the final ranking, resulting in 297 total ranked census tracts.

All of Tier 1 and Tier 2 census tracts in the largest cities in Massachusetts are in Boston, Springfield, and Worcester. In Boston, the tracts with the highest DI scores include the neighborhoods of Roxbury and Dorchester. In Springfield, tracts with the highest DI scores were largely in and around the Metro Center, as well as the South End, Memorial Square, Old Hill, and Six Corners. In Worcester, high scoring tracts were also in and around Downtown, including: Lincoln and Federal Square, Piedmont, Green Island, as well as Great Brook Valley on the East Side. Both Lowell and Cambridge had areas with elevated DI scores, but overall,

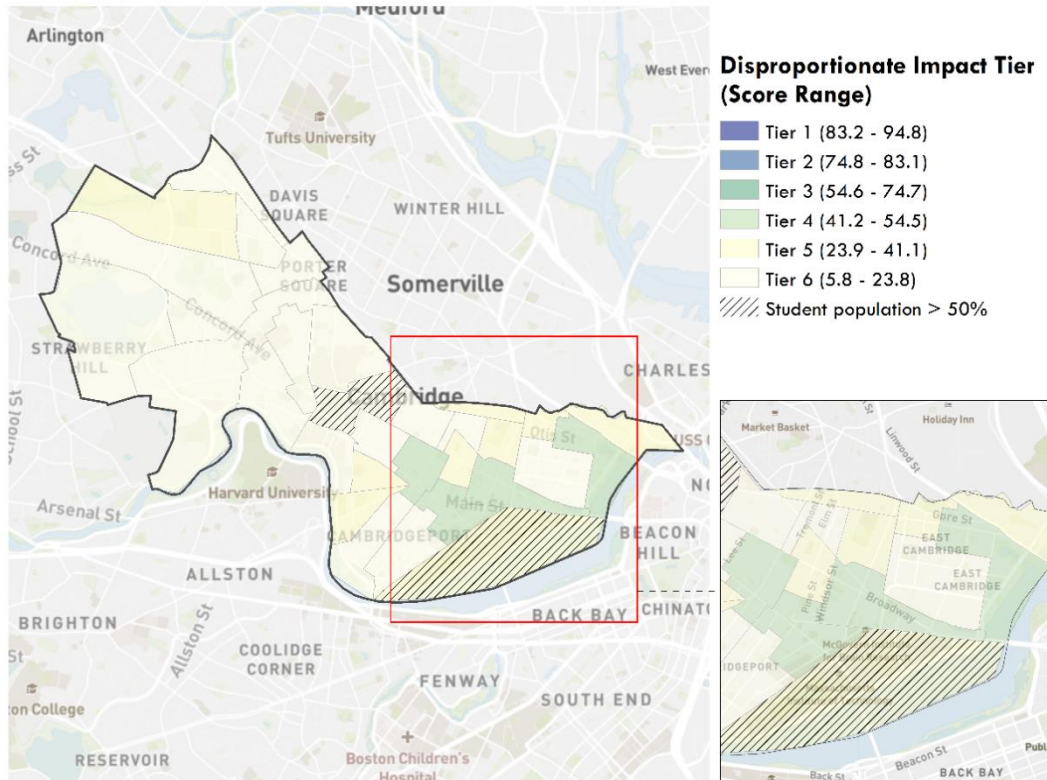

none of the tracts in these two cities rank among the most disproportionately impacted among the tracts in the largest cities of the state.

59	Census Tract 1003	Boston	Dorchester	Suffolk	74.81	Tier 2	No

Note: 15 tracts grayed out and italicized had rates of high student enrollment (more than 50% of residents enrolled in undergraduate or graduate degree programs). Tiers were created with these places included. Boston neighborhoods are based on neighborhood definitions from the Boston Planning and Development Authority (BPDA).

See *Appendix II. Data. Table VI-7* for DI scores and components for all Massachusetts Municipalities, 2000-2017 and *Appendix II. Data. Table VI-8* for DI scores and components for all Census Tracts of large Massachusetts cities, 2000-20017.

V. Conclusion

This study used 18 years of drug arrest data as well as area-level socioeconomic and demographic data to generate a successive method for assessing the historical impact of cannabis prohibition and the “War on Drugs” to rank Massachusetts municipalities and census tracts according to this disproportionate impact (DI) score. This score identifies the DIAs in Massachusetts. The methodology extends prior efforts to rank Massachusetts areas by incorporating incident-level drug arrest data for most Massachusetts municipalities, and directly including race and ethnicity information in the scoring model.

It is notable that a majority of towns on the current list of DIAs⁴ maintained by the Commission fall in Tiers 1 and 2 based on the DI score created in this analysis. Further, many in Tier 1, in particular, are state legislatively recognized “Gateway Cities.” Gateway Cities are midsized urban centers that serve as regional economic anchors around the state and face a variety of significant social and economic challenges.⁵

Limitations

There are several limitations to this study summarized below. Additional detail can be found in the Appendix. First, the arrest data utilized in this study contained information on the address of an arrest and the law enforcement agency making the arrest (*i.e.*, *Boston Police Department*, *Amherst Police Department*). This study used the addresses of where the arrest took place to assign arrests to a geographic area; information on the residential address of the people who were arrested was not available. Thus, if individuals passing through or visiting an area were arrested in large numbers, it would inflate the count of arrests and the rate of arrests assigned to that area and would be utilized in the DI score. This was addressed by excluding certain locations (*e.g.*, *the Xfinity Center in Mansfield*), but that approach cannot fully account for non-residents being arrested in an area. Relatedly, some communities with elevated scores (*e.g.*, *Peabody*, *Marlborough*, and *Waltham*) are on major transit routes which could have resulted in a higher-than-expected number of arrests. There may be other towns with seasonal fluctuations in population (*e.g.*, *Falmouth and Truro*) that could have influenced how the town ranked with regard to arrests and poverty, but that did not meet the conservative criteria established for seasonality-based exclusions in this study [See *Section III. Methods, Other Considerations*].

Arrest data about juveniles under age 18 were not provided by the BPD. To maintain comparability across the state, juveniles were excluded from the NIBRS-based analyses as well (n=18,522). The impacts, however, of juvenile arrests are particularly difficult for varying areas, making this an important limitation of the DI score and a natural place for further assessment and inclusion in the future.

The federal poverty line does not capture regional variations in the cost of living. As a result, the relative economic deprivation for households is likely higher in high-cost areas, such as Greater Boston, than more low-cost areas.

Not all municipalities reported data to NIBRS during our study period. Boston is one such example, but data were obtained directly from BPD to address this limitation. The next largest example is Lawrence, a city of more than 80,000 people which only started reporting to NIBRS in 2020. Because of this gap in the data, Lawrence could not be included in the rankings of municipalities. Based on the demographics and economics of Lawrence, though, it is highly likely the city would rank high on the DI score if all data were available, indicating another natural place for further assessment and inclusion in the future.

Directions for Future Research

Juvenile populations

The impact of arrest and involvement with the criminal justice system during adolescence may result in different negative outcomes related to future employment, income, and family formation.¹³ The Commission should consider follow-up research to examine impacts of the “War on Drugs” on juveniles. Such an analysis would likely need to incorporate data that captures arrests as well as other markers of juveniles’ interactions with law enforcement and the criminal justice system.

Incarcerated populations

This study focused on drug-related arrests and was unable to consider impacts of other criminal justice system contact such as drug-related incarcerations and other forms of correctional control. Because incarceration has such negative impacts on individuals and areas, future research on this cohort should include measures of incarceration and related consequences (*i.e.*, *parole*, *probation*) in addition to drug arrests.

Policy Considerations

This study highlights the top tiers of municipalities and census tracts on a measure of the impact of drug policy enforcement, with the top tiers of areas on the DI score indicating the most negatively impacted. The study can be used by the Commission to inform equitable policy and to help rectify and ameliorate the harms done by drug policy enforcement, particularly among low-income populations and communities of color.

This study involved careful construction of a quantitative measure for assessing disproportionate impact of drug enforcement across the Commonwealth. Throughout the report, special attention is paid to communities and census tracts that rank in the top two tiers on the DI score because they have been the most negatively impacted according to the measure. There is a full list of 295 municipalities and 305 census tracts ranked by DI score in the Appendix [See *Table VI-6*]; the precise cutoff point for an updated DIA list is a decision for the Commission.

Based on the relative nature of the calculated DI score (*i.e.*, *areas with higher scores are “more impacted” than areas with lower scores*), it may be appropriate for the Commission to consider a graduated scheme that uses different strategies to attempt to address the impacts of drug policy

enforcement on areas in different tiers (or other groupings of areas). Such an approach would reflect the reality that in Tier 1 of the DI score, most residents may have experienced negative impacts from drug policy enforcement. In contrast, lower tiers are likely to be a subset of people who have such experiences. Eligibility for priority license status and other benefits could be based on a combination of requirements such as residence in a Tier 2 DIA and membership in an additional priority group (*e.g., personal or family history of drug arrest or incarceration; Black race and/or Latino ethnicity*).

It should be noted that disproportionate impact of drug policy enforcement occurs alongside and interacts with other economic and social problems (*e.g., slow job growth, low quality schools, etc.*). Thoughtful and strategic utilization of the DI score for policymaking can help improve social equity within the cannabis industry and in areas that have long faced social and economic challenges in the Commonwealth.

VII. Appendices

Appendix I. Detailed Study Design and Methods

Additional methodological details to supplement information in previous sections are provided here. As described previously, data were analyzed for four time spans within the 18-year study period. For each time span, the source of population data is described in Table VI-1.

Table VII-1. Time spans and Corresponding Population Data Source(s)

Arrests between years	Population data source(s)
2000-2004	2000 Decennial Census
2005-2009	2000 Decennial Census
2010-2014	2010-2014 ACS 5-year set 2010 Decennial Census (for non-Latino racial shares only)
2015-2017	2013-2017 ACS 5-year set 2010 Decennial Census (for non-Latino racial shares only)

Geocoding

For the municipal-level analysis, the NIBRS data included information on where the arrest occurred used to assign each arrest to an area. To conduct geography-based analysis at the census tract level for the five largest cities in Massachusetts (Boston, Cambridge, Lowell, Springfield, and Worcester), each arrest from these areas were assigned to a specific census tract.

Data obtained from NIBRS and BPD include address-level information for the place an arrest occurred, which enabled the analyses to be geocoded (*i.e., assign a latitude and longitude to each arrest*) and aggregate arrests at the census tract level. To do this, unique identifiers were created for each arrest in the five largest cities associated with a drug offense incident. If the same individual was involved in and arrested for more than one incident, it was counted as multiple arrests.

The geocoding process was completed using three geocoding services: the address batch geocoder from the U.S. Census Bureau,¹⁴ and two private batch geocoding services – Geocodio¹⁵ and Batchgeo.¹⁶ Zip codes were lacking in most arrest records obtained for this study, but that information is required for the Census geocoder. Therefore, Geocodio and Batchgeo were used to geocode records without zip codes, intersections, and non-matches from the Census geocoder. Addresses not readable by geocoders, such as highways and place names, were geocoded by hand using ArcGIS software.¹⁷

There were 60,722 unique arrests in the NIBRS data for five largest cities (before exclusions) and 99.9 percent were successfully assigned a geocode. Fifty-six percent of those were geocoded by Geocodio or Batchgeo, with an average accuracy score of 98 percent. Ultimately, only 60 arrests were unable to be geocoded, all from the Springfield Police Department, due to

incomplete or missing street addresses. For BPD records, there were only 26 records out of 71,094 unable to be geocoded.

After geocoding, arrests were mapped to the appropriate census tract. Counts of arrests within each of the study time spans (2000-2004, 2005-2009, 2010-2014, 2015-2017) were then created at a tract and municipal level. Arrest data was then merged with population socioeconomic and demographic data for the key indicators in the same time spans and geographic areas.

Limitations

In addition to limitations mentioned above, there are a few additional considerations.

Poverty:

Some populations are excluded from data on poverty, including:

- Institutional group quarters (such as prisons or nursing homes);
- College dormitories (off-campus housing is still included, which can lead to high rates in college towns like Amherst or Williamstown);
- Military barracks; and
- Individuals without conventional housing (and who are not in shelters).

Latino ethnicity

This analysis included an indicator of the percent of adults that were Black and/or Latino in each geographic area. This crosstabulation of age by non-Latino race for the final two time spans do not exist in ACS 5-year data, so weights from the 2010 Decennial Census were applied to racial data from the ACS. For example, in Boston from 2015-2017, the white adult population from the ACS was 314,152. In 2010, the share of white adults who were non-Latino in Boston was 89 percent, resulting in an estimate of 280,781 white non-Latino adults from 2015-2017.

Appendix II. Data

Figure VII-1. Number of Municipalities Reporting to NIBRS, 1990-2017

Note: Boston did not begin reporting to NIBRS until 2019. Data obtained directly from the Boston Police Department was therefore used instead for the entire study period.

Table VII-2. Municipalities Excluded from Analysis

Municipality	County	2017 Population	Share Black/Latino	Reason for exclusion
Alford	Berkshire	411	4%	Did not report to NIBRS
Amherst	Hampshire	39,880	12%	High student enrollment
Aquinnah	Dukes	640	0%	Reports to NIBRS but had no drug arrests during the study period
Ashfield	Franklin	1,598	2%	Did not report to NIBRS
Avon	Norfolk	4,468	17%	Did not report to NIBRS
Becket	Berkshire	1,852	6%	Did not report to NIBRS
Blandford	Hampden	1,259	0%	Did not report to NIBRS
Brookfield	Worcester	3,406	1%	Did not report to NIBRS
Buckland	Franklin	1,927	0%	Did not report to NIBRS
Charlemont	Franklin	1,110	2%	Did not report to NIBRS
Chester	Hampden	1,529	3%	Did not report to NIBRS
Chilmark	Dukes	1,117	5%	Seasonal location
Clarksburg	Berkshire	1,722	1%	Did not report to NIBRS
Colrain	Franklin	1,631	1%	Did not report to NIBRS
Conway	Franklin	1,800	2%	Did not report to NIBRS
Cummington	Hampshire	860	7%	Did not report to NIBRS
Dighton	Bristol	7,438	4%	Did not report to NIBRS
Egremont	Berkshire	1,255	8%	Did not report to NIBRS
Essex	Essex	3,687	1%	Did not report to NIBRS
Florida	Berkshire	816	2%	Did not report to NIBRS
Gosnold	Dukes	34	0%	Did not report to NIBRS
Granville	Hampden	1,660	2%	Did not report to NIBRS
Hancock	Berkshire	639	2%	Did not report to NIBRS
Hawley	Franklin	425	6%	Did not report to NIBRS
Heath	Franklin	770	2%	Did not report to NIBRS
Hinsdale	Berkshire	1,970	0%	Did not report to NIBRS
Huntington	Hampshire	1,977	3%	Did not report to NIBRS
Lawrence	Essex	79,497	82%	Did not report to NIBRS
Leyden	Franklin	676	0%	Did not report to NIBRS
Manchester-by-the-Sea	Essex	5,327	2%	Seasonal location
Middlefield	Hampshire	464	0%	Did not report to NIBRS
Monroe	Franklin	86	0%	Did not report to NIBRS
Monterey	Berkshire	729	1%	Did not report to NIBRS
Montgomery	Hampden	802	2%	Did not report to NIBRS
Mount Washington	Berkshire	140	0%	Did not report to NIBRS
Nantucket	Nantucket	10,912	17%	Seasonal location
New Ashford	Berkshire	334	7%	Did not report to NIBRS
New Braintree	Worcester	1,247	2%	Did not report to NIBRS
New Marlborough	Berkshire	1,370	4%	Did not report to NIBRS
Otis	Berkshire	1,577	1%	Did not report to NIBRS
Peru	Berkshire	811	2%	Did not report to NIBRS
Petersham	Worcester	1,218	2%	Did not report to NIBRS
Phillipston	Worcester	1,640	2%	Did not report to NIBRS
Plainfield	Hampshire	668	4%	Did not report to NIBRS

Municipality	County	2017 Population	Share Black/Latino	Reason for exclusion
Provincetown	Barnstable	2,952	7%	Seasonal location
Richmond	Berkshire	1,521	1%	Did not report to NIBRS
Rockland	Plymouth	17,849	5%	Did not report to NIBRS
Rowe	Franklin	400	2%	Did not report to NIBRS
Russell	Hampden	1,330	3%	Did not report to NIBRS
Sandisfield	Berkshire	859	2%	Did not report to NIBRS
Savoy	Berkshire	764	7%	Did not report to NIBRS
Shutesbury	Franklin	1,752	6%	Did not report to NIBRS
Stockbridge	Berkshire	1,980	5%	Seasonal location
Sunderland	Franklin	3,662	10%	High student enrollment
Tolland	Hampden	666	1%	Did not report to NIBRS
Tyringham	Berkshire	439	4%	Did not report to NIBRS
Warwick	Franklin	750	2%	Did not report to NIBRS
Washington	Berkshire	499	1%	Did not report to NIBRS
Wellfleet	Barnstable	3,171	3%	Seasonal location
Wendell	Franklin	864	3%	Did not report to NIBRS
Wenham	Essex	5,179	7%	High student enrollment
West Stockbridge	Berkshire	1,095	8%	Did not report to NIBRS
West Tisbury	Dukes	2,417	2%	Seasonal location
Westhampton	Hampshire	1,819	1%	Did not report to NIBRS
Williamstown	Berkshire	7,623	12%	High student enrollment
Windsor	Berkshire	909	1%	Did not report to NIBRS
Worthington	Hampshire	1,253	1%	Did not report to NIBRS

Note: “High student enrollment” indicates undergraduate or graduate student enrollment rates of 20% of the area’s population or higher. “Seasonal location” indicates that more than 40% of arrests occurred in a single season and 25% or more of total housing units in an area are vacant for seasonal use (*i.e., vacation homes*).

For student enrollment percentage see Table VI-6.

Table VII-3. Census Tracts Excluded from Analysis

Tract	City	2017 Population	Share Black/Latino	Reason for exclusion
Census Tract 9801.01	Boston	322	32%	<1,000 residents. Natural areas/parks (Harbor Islands)
Census Tract 9803	Boston	365	53%	<1,000 residents. Natural areas/parks (Franklin Park)
Census Tract 9807	Boston	8	0%	<1,000 residents. Natural areas/parks (Stony Brook Reservation)
Census Tract 9810	Boston	0	0%	<1,000 residents. Natural areas/parks (Arnold Arboretum)
Census Tract 9811	Boston	409	72%	<1,000 residents. Natural areas/parks (Forest Hills Cemetery, Mount Hope Cemetery, Calvary Cemetery)
Census Tract 9812.01	Boston	0	0%	<1,000 residents. Natural areas/parks (Harbor Islands)
Census Tract 9812.02	Boston	224	16%	<1,000 residents. Natural areas/parks (Massport)
Census Tract 9813	Boston	426	35%	<1,000 residents. Major commercial/industrial areas (Boston Logan Airport)
Census Tract 9815.01	Boston	0	0%	<1,000 residents. Natural areas/parks (Charles River)
Census Tract 9815.02	Boston	12	100%	<1,000 residents. Major commercial/industrial area (Suffolk Downs & Irving Oil)
Census Tract 9816	Boston	0	0%	<1,000 residents. Natural areas/parks (Belle Island Reservation)
Census Tract 9817	Boston	0	0%	<1,000 residents. Natural areas/parks (Boston Common)
Census Tract 9818	Boston	22	0%	<1,000 residents. Natural areas/parks (Jamaica Pond & Emerald Necklace)
Census Tract 5.02	Boston	5,641	13%	High student enrollment
Census Tract 7.03	Boston	6,592	17%	High student enrollment
Census Tract 8.03	Boston	3,714	16%	High student enrollment
Census Tract 101.03	Boston	3,354	11%	High student enrollment
Census Tract 102.04	Boston	5,134	14%	High student enrollment
Census Tract 103	Boston	4,859	14%	High student enrollment
Census Tract 104.04	Boston	5,389	16%	High student enrollment
Census Tract 104.05	Boston	6,257	19%	High student enrollment
Census Tract 806.01	Boston	4,493	58%	High student enrollment
Census Tract 808.01	Boston	1,926	17%	High student enrollment
Census Tract 3531.02	Cambridge	5,881	12%	High student enrollment
Census Tract 3537	Cambridge	1,513	18%	High student enrollment
Census Tract 7312.02	Worcester	4,493	58%	High student enrollment
Census Tract 7316	Worcester	6,081	20%	High student enrollment

Note: “High student enrollment” indicates undergraduate or graduate student enrollment rates of 50% or higher within a census tract.

Table VII-4. Point Locations Excluded from Analysis

Municipality	County	2017 City Population	Share Black/Latino	Reason for exclusion
Andover	Essex	35,375	6%	Andover La Quinta 93N (suspected drug trafficking hub: in top 25 statewide and >10% of city total)
Andover	Essex	35,375	6%	Andover Mobil 93N (suspected drug trafficking hub: in top 25 statewide and >10% of city total)
Boston	Suffolk	669,158	42%	Police District building A-1, A-15 Downtown & Charlestown
Boston	Suffolk	669,158	42%	Police District building C-6 South Boston
Boston	Suffolk	669,158	42%	Police District building A-7 East Boston
Boston	Suffolk	669,158	42%	Police District building B-3 Mattapan/North Dorchester
Boston	Suffolk	669,158	42%	Police District building C-11 Dorchester
Boston	Suffolk	669,158	42%	Police District building D-4 South End
Boston	Suffolk	669,158	42%	Police District building B-2 Roxbury
Boston	Suffolk	669,158	42%	Boston Police Headquarters
Boston	Suffolk	669,158	42%	Police District building E-13 Jamaica Plain
Boston	Suffolk	669,158	42%	Police District building E-18 Hyde Park
Boston	Suffolk	669,158	42%	Police District building E-5 West Roxbury
Boston	Suffolk	669,158	42%	Police District building D-14 Brighton
Braintree	Norfolk	37,082	5%	South Shore Plaza Mall (suspected drug trafficking hub: in top 25 statewide and >10% of city total)
Cambridge	Middlesex	110,893	19%	Cambridge Police Headquarters
Lowell	Middlesex	110,964	27%	Lowell Police Headquarters
Lowell	Middlesex	110,964	27%	Lowell Regional Transit Authority (transit hub)
Mansfield	Bristol	23,678	5%	Xfinity Center (suspected drug trafficking hub: in top 25 statewide and >10% of city total)
Springfield	Hampden	154,613	63%	Springfield Police Headquarters
Springfield	Hampden	154,613	63%	Springfield Bus Terminal (transit hub)
Worcester	Worcester	184,743	33%	Worcester Police Headquarters
Worcester	Worcester	184,743	33%	Worcester City Motel (suspected drug trafficking hub: in top 25 statewide and >10% of city total)

Note: “Suspected drug trafficking hub” indicates point locations (based on geocoded latitudes and longitudes) that appeared in top 25 statewide arrest locations and comprised >15% of city’s total arrests.

Table VII-5. Characteristics of Adults Arrested for Drug-Related Offenses in Massachusetts, 2000-2017

	2000-2004		2005-2009		2010-2014		2015-2017		Total

60+	300	0.6	506	0.7	599	1.0	532	1.4	1,937	0.9
Dataset										
Boston Police Department (BPD)	23,350	43.3	24,301	33.4	15,908	25.8	7,535	19.8	71,094	31.4
National Incident-Based Reporting System (NIBRS)	30,598	56.7	48,515	66.6	45,708	74.2	30,576	80.2	155,397	68.6
<p>Note: Class D offenses include marijuana and hashish. Possession denotes charges where the highest charge was possession. Distribution denotes charges where the highest charge was distribution. Ethnicity is reported in these sources as “Hispanic or non-Hispanic.” Race and ethnicity were reported in NIBRS as combined concepts (e.g., <i>Black Hispanic</i>) whereas they were provided as separate variables in the BPD data set. Categorizing race and ethnicity required aggregating separate categories across both data sets; it was not possible to determine how many individuals from the NIBRS data set had an unknown ethnicity. Therefore, the totals are slightly lower than the subtotals for the year bin. The table above corrects for this by defining the “Unknown” category as the difference between the sum of Hispanic and Non-Hispanic and the total for the year bin.</p>										

Table VII-6. Municipalities in Tiers 1 and 2 (Top 20%) of Disproportionate Impact Score, by County

Rank	Municipality	DI Score	Tier (Score Range)	On prior DIA list?
Barnstable County				
16	Barnstable	87.01	Tier 1 (78.7 - 99.5)	No
28	Falmouth	78.67	Tier 1 (78.7 - 99.5)	No
30	Dennis	78.24	Tier 2 (69.6 - 78.6)	No

Note: Ten places with significant seasonal housing/arrests (*) or 20% or more residents in undergraduate or graduate degree programs (‡) have been grayed out and italicized, as have the state's 5 largest cities (†). Auburn and Leicester were tied in the score ranking (^), "-" indicates town did not have data in that time period.

Note: 10 places with significant seasonal housing/arrests (*) or 20% or more residents in undergraduate or graduate degree programs (‡) have been grayed out and italicized, as have the state's 5 largest cities (†). Auburn and Leicester were tied in the score ranking (^), "-" indicates town did not have data in that time period.

Table VII-8. Disproportionate Impact Scores and Score Components for Census Tracts, Large Massachusetts Cities, 2000-2017

Rank	Census Tract Name	City	DIA	Student enroll (%)	2000-2004							2005-2009
