Executive Summary:

Legalized recreational cannabis is a completely new industry in MA.. In these initial stages of development there is a great deal of room for experimentation to find a niche in the rapidly growing market. My strategy is to provide carefully raised cannabis, outdoors, from a strain I have developed called Golden Bough that is tailored for New England climatic conditions. The differentiating feature of my cannabis is that my farm is small, by design, so that I might tend and care for the plants so as to achieve the highest quality flower at harvest. I will then personally dry, trim and cure my cannabis with the help of one employee who will have my direct oversight.

The legalized cannabis industry has followed a trend of massively increased production, generally indoors. My business will be an outlier in opposition to this trend. My outdoor grown, hand produced cannabis tastes better and provides a pleasurable euphoric experience free of chemical additives from a plant produced under the sun and grown in actual soil buffeted by the fresh breeze of our clean Berkshire County air. My customer base will be the cannabis user who values such things.

All of the cannabis I can grow this year is already sold in a wholesale manner to Canna Provisions, a CCC licensed retailer.

The marketing idea is to sell my cannabis strain, Golden Bough, with my story which is the story of my successful landscape architecture business of the same name. The plan is to associate me and my accomplishments and my fanaticism for quality with my cannabis and to sell my cannabis by selling my story. My strain and my brand will be linked with the intention of capturing repeated interest as a result of the consistently highest quality experience provided.

Most competition will be growing already recognized strains in a mass production manner. My cannabis flowers will always be carefully grown, hand tended and processed by me to my exacting specifications.

No start up financing is required for this business as it is so small. With my first year's production already sold my financial success is dependent only on receiving my cultivation license by May 1 to allow for a full cultivation cycle.

Industry Overview:

Cannabis is a new and developing business in Massachusetts. Trends in other states with legalization show a drop in price of product as more large scale producers come on-line. But small scale artisanal operations do persist, particularly those with early exposure and brand identification. I am attempting to fill part of this small scale artisanal niche in our state, where cultivation outdoors is quite demanding and driven by high levels of horticultural skill. My product will be consistently monitored by me in all phases of production to achieve extremely high quality flowers and trim.

Market Analysis and Competition:

Competition is limited at this point as almost all production is focused on large scale industrial indoor grow operations. My production method is the antithesis of this model. As such my product will stand out. There are no other cannabis producers with the level of artistic recognition that I have achieved in my landscape architecture business. The synergy of marketing my artistic production and landscape architectural accomplishment with my cannabis production is unmatched by any other grower. The wholesale value of my production will range from \$300000 in a bad year to \$500000 in a good year. Chances are that the wholesale prices will tend to decline with time as increased production comes on-line in the state. That is why it is imperative to produce and outdoor crop this growing season.

Sales and Marketing:

My sales and marketing will be tied to my retail buyers. I expect some earned media coverage as two inquiries have already been made. The quality of the product and the story associated with the strain and me the cultivator will be used to attract interest.

Product Offering:

I will produce high quality cannabis flowers and trim. It will be grown outdoors in soil with only organic nutrients and no pesticides applied in a manner consistent with organic vegetable production.

I will be in charge of the growing, harvest trimming and curing of my 55 plants.

Pricing:

For 2019, I have a contract to sell to Canna Provision at \$1500 per pound of quality cured flower plus the market rate for trim. It is likely that this price will drop over time to meet the national wholesale rate of \$700- \$1000 per pound. Even at the reduced rate expected this will offer a fine profit, as expenses for the small outdoor grow are relatively minimal after the initial set up to comply with licensing requirements. But it does underscore the importance of licensure prior to May 31 to ensure the time to produce an outdoor crop.

Sales, distribution and advertising:

As a wholesaler the sales, distribution and advertising of my cannabis will be handled by the retailer that purchases it.

Ownership and Management Plan:

Wiseacre Farm, Inc. is a domestic for-profit corporation registered with the Commonwealth and engaged in the cultivation and wholesale sale of cannabis bud and trim to licensed retailers.

Management Team:

To begin I will be in charge of all aspects of this operation. Please see my attached resume.

As the season progresses i will hire at most two additional people to help with the harvest and compliance with the Metrc monitoring system.

External Resources:

The accountant for this project is Barry Clairmont of Lombardi Clairmont Keegan. The attorney for this project is Lori Robbins of Heller Robbins. Joe Nicholson of Plymouth Armor is my security consultant. Brian Grindel is my consultant for security cameras, locks and alarms. Dominic Sinopoli of Farm Family Insurance helping me to find liability insurance. BiotrakTHC is the contractor supporting me with my compliance with the Metrc seed to source monitoring system. Meg Sanders and Erik Williams of Will and Way Consulting are my business advisors.

Operating Plan:

Wiseacre Farm, Inc. has entered into a long term lease with Jon Piasecki, the owner of a 55 acre farm in West Stockbridge MA.. Wiseacre Farm, Inc. will lease space to accommodate 4400 square feet of secured outdoor cannabis canopy and 520 square feet of secured processing and storage space within an existing structure on the Piasecki property.

Financial Plan:

I have adequate finances to build an outdoor grow and production facility for wholesale sales in a manner that is compliant with the requirements of the Cannabis Control Commission.

I have a contract with a buyer to sell all of the useable cannabis of my strain "Golden Bough", that I can grow.

'Black Panther' triumphs at Screen Actors Guild Awards

Nabbing SAG's top honor puts superhero sensation in Oscar race

By JAKE COYLE
The Associated Press

LOS ANGELES — "Black Panther" took the top award at Sunday's 25th Screen Actors Guild Awards, giving Ryan Coogler's superhero sensation its most significant awards-season honor yet and potentially setting up Wakanda for a major role at next month's Academy Awards.

The two leading Oscar nominees — "Roma" and "The Favourite" — were bypassed by the actors guild for a best ensemble field that also included "BlacKkKlansman," "Crazy Rich Asians," "Bohemian Rhapsody" and "A Star Is Born." Although "Black Panther" wasn't nominated for any individual SAG Awards, it took home the final award at the Shrine Auditorium in Los Angeles.

Before a stage full of actors, Chadwick Boseman tried to put into context the moment for the trailblazing "Black Panther," which also won for its stunt performer ensemble. "To be young, gifted and black," he said, quoting the Nina Simone song.

"We know what it's like to be told there isn't a screen for you to be featured on, a stage for you to be featured on. ... We know what's like to be beneath and not above. And that is what we went to work with every day," said Boseman. "We knew that we could create a world that exemplified a world we wanted to see. We knew that we had something to give."

The win puts "Black Panther" squarely in contention for best picture at the Academy Awards where it's nominated for seven honors including best picture. Actors make up the largest percentage of the academy, so their preferences can have an especially large impact on the Oscar race. In the last decade the SAG ensemble winner has gone

From left, "Black Panther" cast members Danai Gurira, Isaach de Bankole, Chadwick Boseman, Lupita Nyong'o and Angela Bassett accept the award for outstanding performance by a cast in a motion picture at the 25th annual Screen Actors Guild Awards Sunday at the Shrine Auditorium & Expo Hall in Los Angeles.

on to win best picture at the Academy Awards half of the time.

In the lead acting categories, Glenn Close and Rami Malek solidified themselves as front-runners with wins that followed their triumphs at the Golden Globes. The 71-year-old Close, a seven-time nominee but never an Oscar winner, won best actress for her performance in "The Wife." In her speech, she spoke about the power of film in a multiscreen world.

"One of the most powerful things we have as human beings are two eyes looking into two eyes," said Close.

"Film is the only art form that allows us the close-up."

Malek, winning best actor over Christian Bale ("Vice") and Bradley Cooper ("A Star Is Born") for his performance in "Bohemian Rhapsody," seemingly sealed the Oscar

many are predicting for him.

As he did at the Globes, Malek dedicated his award to Mercury.

"I get some power from him that's about stepping up and living your best life, being exactly who you want to be and accomplishing everything you so desire," said Malek.

More surprising was Emily Blunt's best supporting actress win for her performance in the horror thriller "A Quiet Place." Blunt, also nominated by the guild for her lead performance in "Mary Poppins Returns," was visibly shocked. She wasn't among Tuesday's Oscar nominees for either film.

"Guys. That truly has blown my slicked hair back," said Blunt, who praised her husband and "A Quiet Place" director John Krasinski as a "stunning filmmaker." "Thank you for giving me the part. You would have been in major trouble if you hadn't."

Best supporting actor in a film went more as expected. Mahershala Ali, who won two years ago for "Moonlight," won for his performance in Peter Farrelly's interracial road trip "Green Book."

The Amazon series "The Marvelous Mrs. Maisel" won the first three

awards handed out Sunday, sweeping the comedy series awards. It won best ensemble in a comedy series, as well as individual honors for Rachel Brosnahan and Tony Shalhoub, whose win was a surprise in a category that included Bill Hader ("Barry") and Michael Douglas ("The Kominsky Method").

"We cannot thank you enough," said Shalhoub, speaking for the cast. "Stay with us."

Tom Hanks presented the lifetime achievement award to Alan Alda, who in July revealed that he had been living with Parkinson's disease for more than three years. The 83-year-old actor took the stage to a standing ovation while the theme to "M.A.S.H." played. He said the award came at a reflective moment for him.

"I see more than ever now how proud I am to be a part of our brotherhood and sisterhood of actors," said Alda. "It may never have been more urgent to see the world through another person's eyes. When a culture is divided so sharply, actors can help — a least a little — just by doing what we do. And the nice part is it's fun to do it. So my wish for all of us is: Let's stay playful."

Wisecre Farm Plan to Remain Compliant with Local Zoning

Application # MCN281406

The purpose of this plan is to outline how Wisecre Farm, Inc. will remain in compliance with local codes, ordinances, and bylaws for the physical address of our Marijuana Establishment at 276 Great Barrington Road in West Stockbridge, MA, which shall include, but not be limited to, the identification of any local licensing requirements for the adult use of marijuana

Background

Section 9.1 of the Town of West Stockbridge Zoning by laws “Marijuana Related Uses” regulates the time place and manner of Marijuana Establishments. Under Section 4.11.1 “Table of Uses” Tier 1 Cultivators are allowed in the R3 zoning district with the issuance of a special permit from the West Stockbridge Planning Board.

Section 4.11.3.7 states, “A special permit for cultivation of marijuana for commercial purposes may only be granted in a residential district when the proposed use is part of the activity of a farm. For the purposes of this section a farm is defined as having more than 5 acres dedicated to agricultural production and the farm must meet the federal definition of a farm where the entity has an EIN number and shows a minimum of gross sales of \$2500 of any agricultural commodity.”

Wisecre Farm, Inc. is in a lease agreement on a farm where 8 acres are dedicated to agricultural production and has an EIN number associated with this agricultural production and a schedule F. from the federal taxes of the farm that shows gross sales in excess of \$2500 for 2018. As such Wisecre Farm, Inc. explicitly meets the criteria to receive a special permit from the West Stockbridge Planning Board for the purposes of Commercial Cultivation of Marijuana. Outdoor Cultivation also requires that cultivation must be 10 feet or greater from any property line, at least 45 from the front property line and no cultivation may be visible from a public way.

The design for the outdoor commercial cultivation of marijuana by Wisecre Farm, Inc. meets all of these criteria.

The Wisecre Farm management team has reviewed this bylaw in its entirety and have developed plans and strategies on compliance with all of the requirements and special permit conditions. We plan to immediately apply for a Special Permit from the West Stockbridge Planning Board and will meet all of the special permit conditions.

Ongoing Compliance

Wisecre Farm is committed to remaining in compliance with all with local codes, ordinances, and bylaws. We will engage the services of a compliance consultant who will make periodic assessments of our operation for compliance with all applicable local, state and federal laws and regulations, including zoning and special permit compliance.

The company’s owner will remain in contact with municipal officials including the Town Clerk, Board of Selectmen, Planning Board, Building Inspector and other applicable officials to ensure that there is an open line of communication. We will remain up to date with all zoning ordinance changes and requirements to ensure that Wisecre Farm, Inc. remains in compliance.

To provide clear and concise instructions for Wiseacre Farm employees on Quality Control and Testing that are in compliance with the Regulations

Wiseacre Farm is committed to cultivating healthy, high quality disease-free marijuana. Contaminants such as mold, fungus, bacterial diseases, rot, pests, pesticides not in compliance with 500.120(5) for use on marijuana and mildew are the biggest threat to a marijuana cultivation facility and its products. Wiseacre Farm will utilize Best Management Practices (“BMP”) for the prevention and treatment of possible contaminants using the safest and least invasive means.

Testing of Marijuana and Marijuana Products

Wisecre Farm sampling and testing policies and procedures are compliant with the testing requirements outlined in 935 CMR 725.160 and the “*Protocol for sampling and analysis of finished medical marijuana products and marijuana-infused products for Massachusetts Registered Medical Marijuana Dispensaries*” (“the Protocol”) published by DPH.

Testing of environmental media (e.g., soils, solid growing media, and water) shall be performed in compliance with the “*Protocol for Sampling and Analysis of Environmental Media for Massachusetts Registered Medical Marijuana Dispensaries*” published by the DPH.

Wisecre Farm will contract with a Licensed Independent Testing Laboratory to test all marijuana batches prior to packaging to ensure contaminant-free purity and correct dosage and potency. We have begun discussions with several Marijuana Testing laboratories which are Accredited to International Organization for Standardization (ISO) 17025 by a third-party accrediting body that is a signatory to the International Laboratory Accreditation Cooperation

(ILAC) Mutual Recognition Arrangement. Any Laboratory that Wiseacre Farm contracts with will be Licensed by the Commission prior to Wiseacre Farm contracting them for testing services.

Sampling of marijuana for testing will be done in accordance with the Protocol as follows:

- Label
 - Label each Sample Container with the Production Batch ID, date and time of sampling, and sampler's initials
- Fill out the Chain of Custody (see sample below)
 - List the same info on the chain of custody
 - One sample ID goes on one line
 - Check the appropriate boxes
 - Make sure date and time stamp are filled in
- Sampling
 - Heaping an adequately mixed and homogenized product into a square shape
 - Divide the heap into four equal quarters
 - Select samples from two of the opposite quarters, which are mixed and sampled
 - The remaining quarters will then be combined and mixed and used for microbiological and contaminant testing
 - Repeat the quartering process until the required quantity is obtained (Determined by the Testing Lab)
- Storing Sample
 - Store samples in a cool, dry location until samples are picked up by a Testing Lab courier
- All Testing samples will be recorded in the Metrc system.

The testing lab will pick up and transport our testing samples to and from their lab. This transportation will comply with the Wiseacre Farm policies and procedures and 935 CMR 500.105(13) if applicable. We will also ensure that the storage of all marijuana products at the laboratory complies with 935 CMR 500.105(11). Any and all excess Wiseacre Farm marijuana product samples used in testing will be disposed of in compliance with 935 CMR 500.105(12), either by the Independent Testing Laboratory returning excess marijuana to the Wiseacre Farm Facility for disposal or by the Independent Testing Laboratory disposing of it directly

Wiseacre Farm will not sell or otherwise market for adult use any Marijuana Product that is not capable of being tested by Independent Testing Laboratories, except as allowed under 935 CMR 500.000. The product must be deemed to comply with the standards required under 935 CMR 500.160

Required testing includes:

- Cannabinoid Profile

- Contaminants as specified by the Department/Commission including, but not limited to:
 - Mold
 - Mildew
 - Heavy metals
 - Plant-Growth Regulators and Pesticides that are compliant with M.G.L. c. 132B and the regulations promulgated at 333 CMR 2.00 through 333 CMR 14.00.
 - Bacteria
 - Fungi
 - Mycotoxins.

Wisacre Farm will maintain the results of all testing for no less than one year.

Wisacre Farm will arrange for testing to be conducted in accordance with the frequency required by the Department/Commission.

If a batch of marijuana fails a quality assurance test, it will be quarantined and stored away from other product and the Commission will be notified within 72 hours of these results. Wisacre Farm will submit to the Commission upon their request, any information regarding contamination. The batch will be retested, remediated or destroyed as determined by Management.

This policy will be available to registered qualifying patients and personal caregivers. Any notifications indicating contamination that cannot be remediated will include a proposed plan for destruction of contaminated product and assessment of the source of contamination.

Quality Control Testing

Wisacre Farm will submit duplicate testing samples for quality control purposes. These samples will be collected at least annually and one (1) for every twenty (20) field samples of the solid marijuana collected.

These duplicate samples will be collected and analyzed for each analytical method performed on the samples.

These duplicate samples will not be identified to the laboratory (blind QC).

Policy for Responding to Laboratory Results that Indicate Contaminant Levels are Above Acceptable Limits

If a laboratory test result indicates that a Wisacre Farm marijuana product sample has contaminant levels above the acceptable limits established in the DPH protocols identified in 935 CMR 500.160(1) Wisacre Farm will:

- Immediately segregate the cultivation or production batch and evaluate next steps.
 - Using the flowchart below (*Actions in Response to Laboratory Analytical Results*), the Cultivation Manager and CEO will determine whether to:
 - Retest the Cultivation/Production Batch
 - Remediate the Cultivation/Production Batch

- Dispose of Cultivation/Production Batch
- If the test result indicates has a contaminant level for Pesticides that is above the acceptable limits the Production Batch will be immediately disposed of.
- If it is determined that the Production Batch cannot be remediated, it will be disposed of.
- In the case of disposal under 1 and 2 above the Wiseacre Farm Cultivation Manager or Designee will:
 - Notify the Commission within 72 hours of the laboratory testing results indicating that the contamination cannot be remediated.
 - The notification to the Commission will describe the proposed plan of action for both the destruction of the contaminated product and the assessment of the source of contamination.
- In the case of any test result that indicates that a Wiseacre Farm marijuana product sample has contaminant levels above the acceptable limits, the Cultivation Manager or designee will conduct an assessment of the source of the contamination.
 - This extensive assessment will include investigating all possible sources of contamination including water, media, nutrients, environmental conditions and employee factors.
 - The assessment should include a corrective action plan and be shared as a training tool with all Wiseacre Farm agents.

Sampling of Media for Testing

This procedure applies to all environmental media that is required to be tested in accordance with the Regulations.

Water will be sampled and analyzed prior to use for cultivation of marijuana and quarterly thereafter.

Quality assurance is responsible for all product sampling to meet the compliance criteria. Wiseacre Farm will contract an approved environmental testing laboratory for the purposes of testing all of our environmental media and water. Follow the process outlined in the “*Sampling Instructions for Massachusetts DPH Medical Marijuana Program*” form below.

Supplies Needed: Sample Form, Chain of Custody, Pen. Marker, Ziploc bag

- Label
 - Label each Ziploc bag with the sample ID, date and time of sampling, and sampler’s initials
- Fill out the Chain of Custody
 - List the same info on the chain of custody
 - One sample ID goes on one line

- Check the appropriate boxes
- Make sure date and time stamp are filled in
- Sampling
 - Fill the Ziploc sample bag with 8 oz. of soil/media
 - Tightly seal the sample bag
- Storing Sample
 - Store samples in a cool, dry location until samples are picked up by a NET Lab courier
- Quality Assurance will perform routine audits and analysis of report from the testing lab.

Sampling of Water for Testing

This procedure applies to all water that is required to be tested in accordance with the Regulations.

The Cultivation Manager is responsible for all water sampling to meet the compliance criteria. Wiseacre Farm will contract with an approved environmental testing laboratory for the purposes of testing all of our water. In compliance with the Regulations and the *“Protocol for sampling and analysis of environmental media for Massachusetts Registered Medical Marijuana Dispensaries”* Wiseacre Farm will sample and test its water supply prior to use for cultivation of marijuana and quarterly thereafter. We will follow the process outlined in the “Sampling Instructions for Marijuana Testing” form below.

Samples will be taken at the location closest to cultivation area prior to any water treatment and immediately following any treatment systems.

We will test our water for the following contaminants;

- Metals;
- Pesticides; and
- Bacteriological

Collecting Water Samples

- Samples should not be collected during any periods of unusual activity such as draining of water lines, immediately after changing treatment cartridges or replenishing of hydroponic nutrient solutions.
- Prior to Sample Collection. The Cultivation Manager or designee will assemble all equipment and information needed before beginning.
 - Items to assemble before sampling include, but are not limited to, the following:
 - Sample collection plan or diagram of locations to ensure representative sample collection
 - Logbook or sample collection forms
 - Chain-of-custody forms (COCs) (See below)

- Disposable gloves
- Clean, decontaminated plastic sheeting or other clean, non-porous surface for sample processing;
- Sample containers appropriate for the analyses required;
 - These will be supplied by the lab.
- Container labels and pen with indelible ink; and
- Supplies to thoroughly clean, decontaminate and dry sampling equipment between samples;
- Sample collection personnel will create a new entry for each sampling event in the sample collection logbook.
- Sample collection documentation should identify the sample collection date and start time, participating personnel and locations sampled, relevant environmental conditions, a description of the sampling procedures and equipment decontamination/cleaning used.
- Sample collection personnel shall identify or determine the number and location of water samples to be collected
 - Sample locations must be recorded in the sample collection logbook. Record the sample location identifier (location ID) for each sample so that it can be utilized to identify the physical location of the sample location within the facility.
 - Location identifiers should be consistent across sampling events to allow tracking of repeated sample locations. The location IDs will be included on sample labels (unless the grab samples are used in a composite sample).
 - In addition to the location ID, create a unique sample ID for each sample. Sample identifiers should be unique for a given sample event. Record the location and sample IDs in the sample collection logbook or forms as well as the volume of the sample, preservation, and associated sample containers.
- Any tools that contact the samples should be made of stainless steel or other inert material to avoid potential contamination of the sample. In addition, all tools that come in contact with the sample media should be rinsed with deionized water between samples to reduce potential cross contamination.
- Preparing sample labels and affixing them to sample containers immediately before sampling.
 - Information to include on the label includes at a minimum the location and sample ID and date/time of collection. Additional information that must be recorded in documentation if not on the label includes sample collector's name, environmental media type, collection method, whether the sample is

a grab or composite sample, and preservation (if applicable).

- Sample Collection. Collect the planned samples from each sample location one at a time:
 - Don gloves to mitigate potential for contamination of samples
 - Spread clean, decontaminated plastic sheeting or other nonporous surface near the sample location and lay out any tools and equipment needed.
 - Prepare the sample location by removing faucet aerators if connected. Note the location of any water treatment systems and remove if required to represent pre-treatment location.
 - For sample collection of water lines, purge the lines of standing water and note purge time in sample collection documentation. Generally, for frequently used water 15 minutes run time is considered sufficient but actual time for purge depends on pipe volume and frequency of use.
 - Open the pre-labeled sample containers appropriate for the analyses taking care to not allow errant drips or splashes off other surfaces to enter the caps or containers.
 - Samples for all analyses may be collected directly into sample containers or into a larger, inert vessel then poured into containers. During sample collection, make sure that the tap or spigot does not contact the sample container.
 - Record the time each sample was collected and record any difficulties, inconsistencies with the sampling plan, or other remarks (e.g., environmental conditions) that might be relevant to data analysis or quality assurance.
 - Samples should be refrigerated or maintained on ice until shipped to the analytical laboratory.
 - Chain-of-custody paperwork should be completed immediately prior to shipment.
- Sample Handling
 - After samples are properly collected and labeled, they should be delivered for analysis as soon as possible. This section describes how to handle, securely store, package, and ship the samples to the laboratory.
 - Sample containers both empty and once containing samples shall be stored in a contaminant-free environment to the degree possible. Sample containers should not be stored for more than one (1) year.
 - All samples should be collected and stored in containers of the appropriate materials based on the analysis method being performed.
 - Until the samples are analyzed, they should be preserved to minimize chemical or physical changes according to the analytical method references.
- Sample Storage
 - Samples should be refrigerated or maintained on ice (4 °C +/-2°C) until they are shipped to the analytical laboratory.
 - Placing the samples in airtight containers with minimal headspace preserves

samples by minimizing moisture loss and chemical exchange between the sample medium and air.

- In addition, protect the samples from excessive light exposure to minimize photochemical degradation. Samples can be protected from light by using an amber sample container, storing the samples in a closed box or other amber container, or in a dark storage location.
- To be considered valid, all samples must be analyzed prior to expiration of the technical holding time as defined in each analytical method. Note that the holding time for some biological components is very short; 24 to 48 hours from the time of collection.

Sampling Instructions for Environmental Media and Water

For a full suite of analyses on a water sample:

At each sample point, label one of each of the following bottles with the sample ID, date and time of sampling and sampler's initials:

1. One 1-L amber glass jar with no preservative
2. One 16-oz plastic bottle with no preservative
3. One 16-oz plastic jar, pre-preserved with HNO₃. Note: HNO₃ is nitric acid. Use caution when filling bottle.
4. Three sterile cups. Make sure each label has the sample ID and one of the three bacteria tests (TC, HPC, and FC). Each of these tests require an individual bottle.

Fill out the Chain of Custody with the same information as on the bottle labels. Note: One sample ID goes on one line. Each individual bottle does not require its own line. Simply check the appropriate boxes, make sure date and time sampled is filled in, that the sample ID is correct.

At each sampling point, fill all six bottles **completely**. Do not touch the inside of the sterile cups or their caps or put the caps down on a dirty counter. Make sure all bottles are tightly capped and store inside a refrigerator at 4°C until samples are picked up by a lab courier.

For a full suite of analyses on a soil sample:

At each sample point, label one sandwich sized Ziploc or 8-oz glass jar with the sample ID, date and time of sampling and sampler's initials

Fill out the Chain of Custody with the same information as on the labels. Note: One sample ID goes on one line. Simply check the appropriate boxes, make sure date and time sampled is filled in, that the sample ID is correct.

At each sampling point, fill one container completely. Make sure containers are tightly sealed and store inside a refrigerator at 4°C until samples are picked up by a lab courier.

Wisecre Farm Plan for Positive Impact

Application # MCN281406

Wisecre Farm, Inc. is a small, Tier 1 Cultivator and is planning operating as a traditional agricultural farm. We will operate with the minimal number of employees and only operate 8-9 months out of the year. To the extent possible, Wisecre Farm is committed to allowing people from areas of disproportionate impact experience a positive impact from the operation of our Marijuana Establishment. We understand that some communities and populations have been disproportionately affected by cannabis prohibition and enforcement. Marijuana prohibition and enforcement has produced profoundly unequal outcomes for these communities with higher arrest and incarceration rates.

Through its regulations the Commonwealth of Massachusetts and the Cannabis Control Commission has required the promotion and encouragement of full participation in the marijuana industry by people from communities that have been disproportionately harmed by marijuana prohibition and enforcement and to positively impact those communities. To this end, Wisecre Farm, to the extent that is practical, is also committed to employing, partnering with, and providing programs that will help reverse the negative impacts that marijuana prohibition has had on populations in areas of disproportionate impact.

Wisecre Farm will comply with the requirements of 935 CMR 500.105(4) which provides the permitted and prohibited advertising, branding, marketing, and sponsorship practices of every Marijuana Establishment

Any actions taken, or programs instituted, by Wisecre Farm will not violate the Commission's regulations with respect to limitations on ownership or control or other applicable state laws.

The specifically named organization in this plan has been contacted and will accept the donations for money and time we plan on making and will work with Wisecre Farm in the furthering of their goals.

Being a small, agricultural operation with three or less employees, Wisecre Farm will not be able to participate in typical programs that larger company's utilize for Positive Impact Plans.

Our plan to positively impact areas of disproportionate impact will impact past or present residents of a geographic "areas of disproportionate impact," specifically the City of Pittsfield.

GOALS

1. Provide Donations of money and time to one or more non-profits whose missions are improving a disproportionately impacted areas, specifically Pittsfield .

COMMUNITY SERVICE PARTNER PROGRAM

Wisecre Farm has chosen a non-profit in an area of disproportionate impact whose mission is to improve the community.

Wisecre Farm will provide all of its Agents with 10 hours of paid volunteerism to this non-profit annually. We will begin this paid volunteerism within 90 days of receiving our Provisional License from the Commission. Additionally, Wisecre Farm will donate a minimum for \$1000 annually to this non-profit. The first \$1,000 donation will be made with 60 days of receiving our Provisional

License from the Commission. A second \$1,000 donation will be made 6 months after the first donation. As profits increase our donation to this non-profit will increase.

Wiseacre Farm has identified the following non-profit to partner with:

MEASURING POSITIVE IMPACT ON COMMUNITY

Creating a positive impact on areas of disproportionate impact is fundamental to responsible business ownership. It is Wiseacre Farm's intent to make Positive Impact performance indicators a key factor in determining success.

60 days prior to our license renewal, and annually thereafter, we will produce a comprehensive report on this plan which will outline the metrics and whether we have met our goals. This report will be made available to the Commission and will include the following data:

1. The number of hours that Wiseacre Farm Agents have volunteered to the previously named non-profit; and
2. The amount of money donated to the previously named non-profit.

Dear Jon:

I am writing to let you know we would be happy to receive an annual donation from your cannabis business after you sell your harvest in the fall.

Thank you for informing Habitat that Wisacre Farm, Inc. is part of the mission of the cannabis laws in Massachusetts, which are here to provide social equity in the new cannabis sector. Habitat is pleased to know you are donating to charitable organizations that serve the community targeted by the Cannabis Control Commission.

Habitat works with families to help them acquire the access, skills and financial education necessary for them to be successful homeowners. By partnering with us, families seize the opportunity and possibility that decent, affordable housing represents.

Together, we are building strength, stability and self-reliance through shelter

My sincerest thanks,
