WHEREAS, the parties intend by this Agreement to satisfy the provisions of G.L. c.94G, Section 3(d), applicable to the operation of the Facility, such activities to be only done in accordance with the applicable state and local laws and regulations in the Town;

NOW THEREFORE, in consideration of the mutual promises and covenants set forth herein, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Company and the Town agree as follows:

1. Recitals

The Parties agree that the above Recitals are true and accurate and that they are incorporated herein and made a part hereof.

2. Annual Payments

In the event that the Company obtains the requisite license and/or approvals as may be required for the operation of the Facility, including but not limited to an occupancy permit from the Town's Building Commissioner and a final license and approval to operate from the CCC, and at the expiration of any final appeal period related thereto, which pennits and/or licenses allow the Company to locate, occupy and operate the a Marijuana Retail Establishment, Marijuana Cultivation Establishment, or Product Manufacturing Establishment at the Property (the "Commencement of Operations") in the Town, then the Company agrees to provide the following Annual Payments. These Annual Payments shall be in addition to and separate from any local sales tax required to be paid to the Town pursuant to G.L. c. 64N,

A. Community Impact Fee

The Company anticipates that the Town will incur additional expenses and impacts on the Town's roads and other infrastructure systems, law enforcement, fire protection services, inspectional services, and permitting and consulting services, administrative services and public health education and substance abuse counseling services, and any necessary and related legal and enforcement costs, as well as unforeseen impacts, both quantifiable and unquantifiable, on the Town. Accordingly, in order to mitigate the financial impact on the Town and use of Town resources, both quantifiable and unquantifiable, the Company agrees to annually pay a Community Impact Fee to the Town, in the amount and under the terms provided herein (the "Community Impact Fee").

- i, Company shall annually pay an Annual Community Impact Fee in an amount equal to three percent (3%) of gross sales from any and all operations at the Facility. The term "Gross Sales" shall mean the total of all marijuana transactions of the Facility without limitation, including wholesale sales, and shall be determined by arms-length wholesale sales made by the Facility during the year and shall include but not be limited to all adult use marijuana and medical marijuana and marijuana products, including marijuana infused products, paraphernalia, and any other products sold, cultivated, processed, manufactured, and/or otherwise transfel-red by the Facility directly to consumers or to other Marijuana Establishments. In the event marijuana or marijuana products are sold by the Company at any marijuana establishment(s) located outside of the Town that is also owned and controlled by the Company, or its affiliates, such that the product is not subject to an arms-length sale, the value of such product for purposes of calculating the Community Impact Fee shall be based on the higher of: (i) 50% of the retail price at which such

marijuana or marijuana products are sold by such marijuana retailer; or (ii) the highest wholesale price charged by the Company in any arms-length transaction during

2

the preceding twelve (12) months. The Company agrees that calculation of the Community Impact Fee in this manner will be within the statutory cap of three percent (3%) of gross sales under G.L. c.94G S3(d) for these combined operations and waives any claims to the contrary.

- ii. The Annual Community Impact Fee shall be made in quarterly installments per the Town's fiscal year (July 1 - June 30) on September 30, December 31, March 31, and June 30 with the first payment due thirty (30) days after the close of each quarter following the Commencement of Operations. The Annual Community Impact Fee for the first year of operation shall be prorated based on the number of months beginning on the Commencement of Operations that the Facility is in operation; provided, however, that in no event shall the Town be responsible for the return of any Annual Community Impact Fee or portion thereof already provided to the Town by the Company.
 - iii. The Annual Community Impact Fee shall continue for a period of five (5) years from the date the Commencement of Operations, and shall be subject to renegotiation for successive terms for as long as the Facility remains in operation. At least ninety (90) days prior to the conclusion of each of the respective five-year terms, the Parties shall meet to negotiate in good faith the terms of a new Annual Community Impact Fee as an Amendment to this Agreement. Provided, however, that if the Parties are unable to reach an agreement on a successor Community Impact Fee, the Community Impact Fee specified in Paragraph 2.A.i of this Agreement shall remain in effect and shall not be reduced below the amount set forth above until such time as the Parties negotiate a successor Community Impact Fee.
111. The Town shall use the above referenced payments in its sole discretion but shall make a good faith effort to allocate said payments to offset costs related to road and other infrastructure systems, law enforcement, fire protection services, inspectional services, public health and addiction services, and permitting and consulting services, as well as unforeseen impacts upon the Town. The Company acknowledges and agrees that the Town is under no obligation to use the Community Impact Fees in any particular manner.
- iv. Pursuant to M.G.L, c. 94G, a "community impact fee shall be reasonably related to the costs imposed upon the municipality by the operation of the marijuana establishment..." ("Town Costs"). Notwithstanding the foregoing, the Parties hereby acknowledge the difficulty in computing actual Town Costs, the Company acknowledges that the impacts of its operation may be impracticable to ascertain and agrees that impacts may result in municipal budgetary increases that cannot be separately identified or precisely quantified. The Company thus agrees to utilize a fixed percentage of Gross Sales as specified in Paragraph 2.A.i above in lieu of attempting to determine

actual Town Costs incurred and the Company agrees that the payments due under this Agreement are reasonably related to Town costs and waives any claims to the contrary.

- v. Annual Community Impact Fees are expressly included as "other municipal charges" pursuant to M.G.L. c. 40, 557. A Town licensing authority may deny, revoke or suspend any license or permit, including renewals and transfers, of the Company or agent thereof if the Company's name appears on a list furnished to the licensing authority from the Town Collector of individuals delinquent on their taxes and/or water bills.

B. Annual Community Benefit Payments

In addition to the Annual Community Impact Fee, the Company agrees that it shall pay an Annual Community Benefit Payment in accordance with the following:

1. For as long as the Facility is in operation, the Company shall pay to the Town the sum of \$ 10,000.00 annually for any municipal purposes, including, but not limited to, funding substance abuse and mental health services in the Town, school substance abuse and counseling services and for a local police officer to complete an Advanced Roadside Impairment Driving Enforcement training program.
2. The Annual Community Benefit Payments shall be made in quarterly installments per the Town's fiscal year (July 1 - June 30) on September 30, December 31, March 31, and June 30 following the Commencement of Operations. The Annual Community Benefit Payment for the first year of operation shall be prorated based on the number of months the Facility is in operation.
3. The Town shall use the Annual Community Benefit Payments in its sole discretion; the Parties hereby recognize and agree that the Annual Community Benefit Payment to be paid by the Company shall not be deemed an impact fee subject to the requirements or limitations set forth in G.L c.94G, 53(d).

C. Additional Costs, Payments and Reimbursements

1. Permit and Connection Fees: The Company hereby acknowledges and accepts, and waives all rights to challenge, contest or appeal, the Town's usual building permit fee and other permit application fees, sewer and water connection fees, and all other local charges and fees generally applicable to other commercial developments in the Town.

review concerning the Facility, including planning, engineering, legal and/or environmental professional consultants and any related reasonable disbursements at standard rates charged by the above-referenced consultants in relation to the Facility that may be required in addition to the Planning Board 's review under the Bylaw. for which reimbursement will be required pursuant to G.L. c.44 *53G. Any Town legal costs associated with the Facility, including the cost to negotiate this Agreement, shall be paid from a \$5,000 contribution made by the Company to the Town within thirty (30) days of the execution of this Agreement. Any unexpended funds shall be returned by the Town; legal fees exceeding the \$5,000 contribution shall be reimbursed to the Town within thirty (30) days of the Town's request for the same.

Other Costs: The Company shall reimburse the Town for the actual costs incurred by the Town in connection with holding public meetings and forums substantially devoted to discussing the Facility and/or reviewing the Facility and for any and all reasonable consulting costs and fees related to the monitoring and enforcement of the terms of this Agreement, including, but not limited to independent financial auditors and legal fees.
4. Late Payment Penalty: The Company acknowledges that time is of the essence with respect to their timely payment of all funds required under this Agreement. In the event that any such payments are not fully made within ten (10) days of the date they are due, the Company shall be required to pay the Town a late payment penalty subject to interest at the rates prescribed by G.L. 59, *57.

D. Annual Charitable/Non-Profit Contributions

The Company, in addition to any funds specified herein, shall annually contribute to local charities/nonprofit organizations in the Town in an amount no less than \$5,000.00, said charities/non-profit organizations to be determined by the Company. The annual charitable contribution shall be made annually beginning on the first anniversary following the Commencement of Operations and shall continue for the term of this Agreement. The Company shall provide the Town with evidence of such payment within thirty (30) days of the annual anniversary of the Commencement of Operations.

The Parties hereby recognize and agree that any Annual Charitable Non/Profit Contribution to be paid by the Company shall not be deemed a community impact fee subject to the requirements or limitations set forth in G.L. c.94G, S3(d).

The Independent Financial Auditor shall review the Company's financial records for purposes of determining that the Payments are in compliance with the terms of this Agreement. Such examination shall be made not less than thirty (30) days following written notice from the Town and shall occur only during normal business hours and at such place where said books, financial records and accounts are maintained. - A. Purpose. To provide for the placement of adult use marijuana establishments, in accordance with An Act To Ensure Safe Access to Marijuana, c. 55 of the Acts of 2017, and all regulations which have or may be issued by the Cannabis Control Commission, including, but not limited to 935 CMR 500.00, in locations suitable for such uses, which will minimize adverse impacts of marijuana establishments on adjacent properties, residential neighborhoods, schools, playgrounds, public beaches and other locations where minors congregate by regulating the siting, design, placement, security, and removal of marijuana establishments.

- (b) The SPGA shall refer copies of the application to all Town departments and boards/commissions, including but not limited to the Building Department, Fire Department, Police Department, Board of Health, and the Conservation Commission. These boards/departments shall review the application and shall submit their written recommendations. Failure to make recommendations within 35 days of referral of the application shall be deemed lack of opposition.
 - (c) After notice and public hearing in accordance with §§ 175-82 and 175-77 of the Bylaw and consideration of application materials, consultant reviews, public comments, and the recommendations of other Town boards and departments, the SPGA may act upon such a permit and

request for site plan approval.

- (2) Special permit conditions for marijuana establishments. The SPGA shall impose conditions reasonably appropriate to improve site design, traffic flow, public safety, protect water quality, air quality, and significant environmental resources, preserve the character of the surrounding area and otherwise serve the purpose of this section. Plan for Positive Impact

The following is a plan by Natural Agricultural Products to positively impact areas of disproportionate impact, as defined by the commission: 935 CMR 500.101(1)(a)(11); 935 CMR 500.102(2)(B)(10).

Natural Agricultural Products, LLC. and its planned retail, cultivation and manufacturing facility will be located in Abington, MA.

Impact Groups:

N.A.P. intends to implement programs to assist past or present residents of Brockton and/or Abington as well as Massachusetts residents who have prior marijuana convictions, and residents with parents or spouses who have prior marijuana convictions.

Goals:

To service the Town of Abington - an approved area of disproportionate impact as stated by the Commonwealth of MA and the Cannabis Control Commission.

Natural Agricultural Products will:

- 1) Ensure that all employees hired are MA residents, with a selective hiring process ensuring no less than 20% of its employees have past drug convictions.
- 2) Provide classes up to twenty (20) persons per session - no less than quarterly (and more upon demand) - for mentoring and professional training of any Brockton and/or Abington residents and employees - including those who are bilingual - to educate and raise awareness of cannabis and the rules and regulations set forth by the Cannabis Control Commission.
- 3) The applicant will donate volunteers and twenty-five thousand (\$25,000) to the Brockton "Champion" Plan. The Champion Plan is a police-assisted recovery program in Brockton that launched on February 29, 2016. The plan is meant to help place individuals with substance use disorders (SUD) who want help into the level of care they want; detoxification, CSS, outpatient, Medically Assisted Treatment (MAT), etc. The Champion Plan provides Recovery Coaches to individuals seeking addiction assistance pending placement to a treatment center. N.A.P.'s volunteerism and donation is intended to assist individuals recovery from addiction and once stabilized in recovery to obtain employment.

Program:

- 1) Natural Agricultural Products shall post monthly advertisements in the local newspaper, The Enterprise, stating that the establishment is specifically looking for Massachusetts residents who have past drug convictions for employment.
- 2) The company shall educate all of its managers via courses provided by the CCC's Responsible Vendor Training Programs to have the ability to mentor and train anyone who would like to further their education or increase their awareness of cannabis, its impact on the local economy, and the benefits it has to physical and mental health. The company shall advertise quarterly classes in the local newspaper no later than two (2) weeks before the class takes place, post on bulletin boards located in our facility, and

have on hand “take-one” flyers available to our customers.

- 3) The company shall engage with The Champion Plan by seeking out opportunities of local volunteerism. Natural Agricultural Products will itself organize food drives, neighborhood and public park clean-ups, and organize projects with the beneficiaries of The Champion Program, holding each no less than once per year. The donations and volunteerism allows the Champion Plan to maintain services and provide recovery coaches to an increasing number of individuals seeking help.

Programs instituted, or actions taken by Natural Agricultural Products will not violate the CCCs regulations with respect to limitations on ownership, control, or other applicable state laws.

We acknowledge that the progress and success of the plan must be documented upon renewal (one year from provisional licensure, and each year thereafter.)

Measurement:

- 1) Hiring Employees with Past Drug Convictions: We will measure the success of this goal by Communicating/collaborating with the local newspaper to ensure that N.A.P. recruits employees that fall within the criteria of our goal as stated without catering to persons under the age of 21 and will at all times adhere to the requirements set forth under 935 CMR 500.105(4) N.A.P. will review the success of this program and review it quarterly and as necessary per employment needs.
- 2) Cannabis Education Classes: The Human Resources department will survey any/all employees/residents that participate in our quarterly cannabis education and awareness classes at the end of each session which the company will use to measure and record the satisfaction and success of the program. We will document and record the results of this program to be reviewed quarterly.
- 3) For the Champion Program: We will measure the success of this goal by monitoring the membership and expansion of the “Champion” Plan and though maintaining regular communication with the Champion Plan to document the number of individuals regaining, maintaining and obtaining employment. Written verification by the Champion Plan that they are willing to accept donations, logged and documented in the manner stated above has been attached. The program will be reviewed and results documented quarterly.

Marketing and Advertising:

Natural Agricultural Products is a wholesale and retail company with a simple logo - the abbreviation of the company’s name (NAP) in custom-made lettering with no shapes, symbols, images, or characters that suggest this is a marijuana facility. N.A.P. will have a website that only adults over the age of 21 can access. As a wholesale and retail company, N.A.P. will be strictly selling our product to other licensed Marijuana Establishments. We will, at all times, ensure we are following the rules and regulations of the CCC set forth under 935 CMR 500.105(4).

ARTICLE III DIRECTORS

Section 1. The business of the corporation shall be managed by its Board of Directors which may exercise all such powers of the corporation and do all such lawful acts and things as are not by statute or by the Articles of Incorporation or by these Bylaws directed or required to be exercised or done by the stockholders.

Directors need not be stockholders.

Section 3. Vacancies in the Board of Directors including those caused by an increase in the number of Directors, may be filled by a majority of the remaining directors, though less than a quorum, or by a sole remaining director, and each director so elected shall hold office until his successor is elected at an annual or a special meeting of the stockholders. The holders of a two-thirds of the outstanding shares of stock entitled to vote may at any time peremptorily terminate the term of office of all or any of the directors by vote at a meeting called for such purpose or by a written statement filed with the secretary or, in his absence, with any other officer. Such removal shall be effective immediately, even if successors are not elected simultaneously and the vacancies on the Board of Directors resulting therefrom shall be filled only by the stockholders.

A vacancy or vacancies in the Board of Directors shall be deemed to exist in case of the death, resignation or removal of any directors, or if the authorized number of directors be increased, or if the stockholders fail at any annual or special meeting of stockholders at which any director or directors are elected to elect the full authorized number of directors to be voted for at that meeting.

The stockholders may elect a director or directors at any time to fill any vacancy or vacancies not filled by the directors. If the Board of Directors accepts the resignation of a director tendered to take effect at a future time, the Board or the stockholders shall have power to elect a successor to take office when the resignation is to become effective.

No reduction of the authorized number of directors shall have the effect of removing any director prior to the expiration of his term of office.

ARTICLE IV MEETINGS OF THE BOARD OF DIRECTORS

Section 1. Regular meetings of the Board of Directors shall be held at any place within or

without the State which has been designated from time to time by resolution of the Board or by written consent of all members of the Board. In the absence of such designation regular meetings shall be held at the registered office of the corporation. Special meetings of the Board may be held either at a place so designated or at the registered office.

Section 2. The first meeting of each newly elected Board of Directors shall be held immediately following the adjournment of the meeting of stockholders and at the place thereof. In case such notice is mailed or telegraphed, it shall be deposited in the United States mail or delivered to the telegraph company at least forty-eight (48) hours prior to the time of the holding of the meeting. In case such notice is delivered as above provided, it shall be so delivered at least twenty-four (24) hours prior to the time of the holding of the meeting. Such mailing, telegraphing or delivery as above provided shall be due, legal and personal notice to such director.

Section 5. Notice of the time and place of holding an adjourned meeting need not be given to the absent directors if the time and place be fixed at the meeting adjourned.

Section 6. The transactions of any meeting of the Board of Directors, however called and noticed or wherever held, shall be as valid as though had at a meeting duly held after regular call and notice, if a quorum be present, and if, either before or after the meeting, each of the directors not present signs a written waiver of notice, or a consent to holding such meeting, or an approval of the minutes thereof. All such waivers, consents or approvals shall be filed with the corporate records or made a part of the minutes of the meeting.

Section 7. A majority of the authorized number of directors shall be necessary to constitute a quorum for the transaction of business, except to adjourn as hereinafter provided. Every act or decision done or made by a majority of the directors present at a meeting duly held at which a quorum is present shall be regarded as the act of the Board of Directors, unless a greater number be required by law, or by the Articles of Incorporation. Any action of a majority, although not at a regularly called meeting, and the record thereof, if assented to in writing by all of the other members of the Board shall be as valid and effective in all respects as if passed by the Board in regular meeting.

Section 8. A quorum of the directors may adjourn any directors meeting to meet again at a

stated day and hour; provided, however, that in the absence of a quorum, a majority of the directors present at any directors meeting, either regular or special, may adjourn from time to time until the time fixed for the next regular meeting of the Board.

ARTICLE V COMMITTEES OF DIRECTORS

Section 1. The Board of Directors may, by resolution adopted by a majority of the whole Board, designate one or more committees of the Board of Directors, each committee to consist of two or more of the directors of the corporation which, to the extent provided in the resolution, shall have and may exercise the power of the Board of Directors in the management of the business and affairs of the corporation and may have power to authorize the seal of the corporation to be affixed to all papers which may require it. Such committee or committees shall have such name or names as may be determined from time to time by the Board of Directors. EXECUTIVE SUMMARY

1.0 Cannabis is a new and exciting Industry introduced to Massachusetts by the will of the voting population in 2016. Natural Agricultural Product's business plan has been created to lay out pertinent information gathered from states that have approved the recreational sale of cannabis for a number of years. This business plan will cover our mission, site analysis, trends, demographics, finance, employment, inventory, and marketing strategies. All informational statistics obtained are listed in the appendix on the last page of this report.

Site analysis is based off 27,000 sq. ft. footprint, allowing 20,000 sq. ft. of canopy for cultivation, 1,500 sq. ft. for packaging and manufacturing, 3,000 sq. ft. dispensary and 2,000 sq. ft of office space.

N.A.P. will begin with 6,000 sq. ft. of canopy, 1,500 for manufacturing, 2,000 of office space, 3,000 sq. ft. retail dispensary, with future plans of expanding our cultivation center to utilize the entire building as stated above. The timeline goal for all to be at full capacity is 3 years.

Demographic information was obtained from government-reported census websites (census.us and neighborhoodscout.com) compiled into charts as to be easily read, and compared. Marketing information explains strategies, and avenues to explore to identify and target our cliental, and demonstrates the need to retain our customer base. Various websites such as cannabisbusinesstimes.com, forbes.com, mjbizdaily.com, and cannabisconsumer.org were used to analyze the business plan information. The marketing tools suggested were blogs, face book, linked in, twitter, Instagram, snapshot, and other social media sites, which we will use toward marketing to retail establishments.

Cultivation according to newfrontierdata.com the average harvest is \$1,120,100 per acre which breaks down to \$257,623.00 for 10,000 sq. ft., harvesting 3-4 times at average per year, adding \$1,000,000 plus for each 10,000 sq. ft. of canopy. Natural Agricultural Products has the capacity to expand their facility up to 20,000 sq. ft., and plan to be at full capacity within 3 years of operation.

Natural Agricultural Products has researched, and contacted qualified, experienced personal that have the ability to train employee's the rules and regulations provided by the Cannabis Control Commission of Massachusetts. N.A.P. will require that all employees attend seminars pertaining to the 935 CMR 500.00: Adult use of marijuana provided by the Commonwealth of Massachusetts at the company expense. N.A.P. will also conduct continuing educational classes, keeping staff up to date on changes to the regulations, and requirements that the CCC could alter or add in the future as the Industry progresses.

The business plan will cover market needs, trends, and growth, with a strategy to accomplish these goals. Pro-forma, and financial statements are subject to change depending on a variety of circumstances such as growth, expansion, and acquisitions. Our focus is to open one (1) retail dispensary as available, one (1) cultivation facility, and

product manufacturing in the town of Abington in 2021. N.A.P. has the research, and development team working on retail locations in Fall River, Taunton, and other surrounding towns in Southeastern Ma. that have a similar demographic and population.

Natural Agricultural Products will progress to extractions of cannabis for vape pens, tinctures, ointments, chocolates, candies, etc. These are other revenue streams that N.A.P. will develop within the first year of opening. N.A.P. has had conversations with entrepreneurs that will sell edibles that would accommodate the retail cannabis Industry. The N.A.P sales team will market to these retailers of our large selection of infused edibles, oils, tinctures, and vapes. N.A.P. has chosen the Town of Abington to use as our model for the opening our first cultivation, and manufacturing facility. The model that N.A.P. will use comes from Boulder Co., whereas the population and household medium are close to the same. The difference that you will see in the business plan is the potential to capitalize on the market that abuts Abington, that is 3 times larger than Boulder Colorado.

The N.A.P. plan within 5 years of operation, year (1) have 1 cultivation facility supplying 10,000 sq. ft. of canopy, 1,500 sq. ft. to manufacture, package, and label flower and vapes. 2,000 sq. ft. for retail dispensary, and 3,000 sq. ft. to consolidate office space. After first year we will be looking to open our second retail dispensary, focusing in different communities, such as Fall River, New Bedford, Taunton, and Abington Ma., We made contact with town officials there, and licenses are available to negotiate a host agreement with them at a timeline suitable for all parties, this would be year two. The start of year three N.A.P. will acquisition all properties that are dispensaries and cultivation centers and rehab the buildings to framework or theme of the neighborhood, in an environmentally friendly manner. The company will covert to clean energy, with the installation of solar and wind power, setting an example to others, and assisting other companies on the process of going green.

2.0 Mission Statement

Natural Agricultural Products, LLC (N.A.P.) is dedicated to providing safe and affordable cannabis products in a professional and secure environment that will meet the needs of our clientele. We are committed to continuing to strengthen our relationship with the cities and towns we locate in by supplying revenue to economically enhance the community and its citizens.

3.0 Site Planning and Analysis

Natural Agricultural Products, LLC plans to open multiple locations. Our focus is Abington Ma. with our company office located at 4 Main St Brockton Ma. 02301 on the 2nd floor.

Dispensaries, and cultivation centers will be located in areas where there is proper zoning and ordinances, no moratorium and with public support. All due diligence will be done before any and all leases are signed to ensure N.A.P. remains compliant at all times.

Our legal team has given an opinion letter attached to this business plan stating that there are no current codes or ordinances prohibiting dispensing operations in our chosen cities and towns such as Abington, Taunton, Fall River, New Bedford, and Brockton. The administrators, Police Chief, and County Sherriff have been notified of the intention to open recreational marijuana businesses and have no objections.

All parties acknowledge that this is governed by the will of the voters, who have passed legislation to allow for the recreational sale of cannabis within the Commonwealth of Massachusetts (935 CMR 500.000). N.A.P. reserves the right to allow for any local official who has voiced any concerns to be active, sitting members on N.A.P.'s Board of Directors, in order to best address any/all concerns voiced. N.A.P. has also promised total transparency to the police by allowing them to connect to all surveillance cameras within any/all locations operated by Natural Agricultural Products, LLC.

The proposed facilities will be located greater than 500 feet from any school, and any other named business by the Commonwealth, thus abiding by state regulations. The facilities will have discreet signs which will at all times conform to all state and local regulations and ordinances. The dispensaries will be completely compliant with ADA laws, allowing for easy access for our handicapped patrons and doors wide enough for a wheelchair.

All N.A.P. facilities will work closely with the community to become an integral part and will address all specific zoning regulations. Natural Agricultural Products, LLC and its Executive Staff are sensitive to the various issues that have arisen pertaining to cannabis companies throughout the country and promise to remain diligent with our continued compliance at all times.

4.0 Estimated Market Size

Natural Agricultural Products, LLC has conducted countless hours of extensive research on the population within the state, as well as our expected marketplace. With all research done, it's

hard to give exact numbers for the market of an industry such as recreational marijuana. All numbers are based off research comprised and analyzed in order to best give an estimated market size for our chosen locations.

Massachusetts has a population of roughly 6.8M residents. Example: our chosen location of Abington, MA, and its surrounding city, and towns have a total population of about 241,724 people. Of that sum, Abington has a total of 15,985 people, giving it around 15.1% of the people living in our immediate area. The chart below shows the breakdown of cities/towns in the greater Abington area for reference:

***All information gathered to be cited on back page**

4.1 Target Market Segment Strategy

The Abington, area's vast, and growing population will serve as an even greater benefit to the recreational marijuana industry as according to cannabisconsumer.org 40.79% of consumers are aged 21-35 while 36-45 come in 2nd at 25.75%. These two age brackets take up 66.54% of the market share. The following chart will go more into details on the age breakdown of Abington, and surrounding cities and towns population and you'll see just how the demographics of Abington fall along perfectly with the industry's demographics not only today, but also tomorrow and for years to come:

Cultivation & manufacturing will play a large part in supplying recreational dispensaries in product. The demographics outside and within the city of Brockton gives Brockton the potential market that can exceed other communities. Brockton is considered the hub of the south shore with 4 state highways routes 18, 123, 58, and 139, and with the population growth retail dispensaries will depend on cultivators, and manufacturers to keep up with the demand.

Brockton, MA Population Breakdown by Age

*All information gathered to be cited on back page.

Brockton's market is unique in its size, relative location to other major cities and its ease of public transportation use.

- As laws are changing to accommodate the growing market, target customers will grow along with it.

5.0 Roadmap/Future Plans

Over the past few years Natural Agricultural Products, LLC have been conducting painstaking research and due diligence discovering what works and what doesn't. We've traveled to Colorado, California and Washington State talking to mayors, dispensary owners and Commissioners. They've shown us the way and given us the blueprint for success. Here's what we've learned:

- Locate the dispensaries downtown to start.
- Cover about 4 sq. blocks and space out evenly about 500 ft. apart.
- Make sure dispensaries are either below grade or on 2nd floor, only if located downtown.
- Leverage mixed use buildings for maximum revenue (i.e. restaurants, market-rate housing, retail stores, etc.)
- Maximize foot traffic and minimize congestion. (Make people want to walk around and spend their money)

By following these steps, we can build off a proven model and minimize mistakes – in turn maximizing profits. With the proper direction, regulation, collaboration, vision and execution, we can not only follow the model set forth from other marijuana pioneers, but we can take it to levels never seen before.

N.A.P.'s current location gives us a unique position to attack on multiple fronts:

1. The size of Brockton (As mentioned previously) is larger than other cities that have legalized the sale of recreational marijuana to adults, giving us more people within the city to reach.
2. Abington and Brockton's unique close proximity to not one, but two state capitols (Boston and Providence) gives our market a broader base.
3. Surrounding cities/towns have declined becoming a "Host Community" gives us more potential customers from neighboring cities/towns 360 degrees around Abington and Brockton.

As previously mentioned, another strategy the executive management team at N.A.P. have been discussing purchasing all locations that we are currently looking at, then turn around and rent the space we aren't using back to new businesses looking to move in to the area to capitalize on the marijuana industry. We build community by engagement.

6.0 Pro Forma/Financial Statements

The Pro forma and financial statements are estimates and are subject to change depending on a variety of circumstances. Financial data was based off historical data from other states that have already adopted recreational marijuana as an industry.

Assumptions

While preparing this pro forma, there were a number of factors that were taken into account as assumptions and factored in as expenses, income and various balance sheet items. All of our facilities will be using the most state-of-the-art technology, software and equipment. Financials have been made based off historical pricing, salaries, expenses and other factors and are all subject to change due to market conditions, price fluctuations and various other factors.

We plan to have one (1) retail dispensaries, one (1) cultivation & manufacturing center and (1) office, all will be built out with energy efficiency, economics and ease of maintenance in the forefront. All income data has been analyzed based off information derived from various credible websites that have extracted data directly from states in which recreational marijuana is currently an industry.

Our cultivation center will include a grow operation that at its peak will cover the maximum 20,000 sq. ft. of canopy, and a manufacturing/processing center that will extract, prepare, manufacture and pack various edibles, extractions, oils, tinctures, salves, vapes, and other MIPs.

Our dispensaries will range in size, but will not exceed the max. size for a dispensary which is 5,000 sq. ft. Each dispensary will have between 5-7 cash registers open at a given time with enough staff to work the cash registers and assist patrons. We will be open the maximum time as allowed by the municipality and will be open every day.

The costs for all expenses, supplies, equipment, hardware, software, buildout, salaries, and any other investment and/cost associated with the preparation of this pro forma and financial statements have been derived from current and historical data analyzed from various cities and states around the country and are all subject to change at any given time based off market conditions and other factors.

9.0 Projected Growing Guide

Cultivating marijuana includes multiple stages of life with a full cycle being roughly 4 months. Cannabis plants will go from seedlings to the vegetation (veg) state, then will start their flowering cycle before beginning their budding stage and finally it will be harvest time – which involves drying and curing the matured marijuana.

Mother plants play a very crucial role in indoor cultivation and can save the cultivation team a lot of valuable time. The 1st stage of a cannabis plant's life (Seedlings) can sometimes take a while before the plant reaches sexual maturity (Male/Female), because of that it is much more efficient to clone a plant that is already a matured female which will be able to begin flowering once roots have taken hold. This is possible because the mother plants will pass along their DNA to the clones, including age. By keeping the clones in the proper light cycle (18+ hours a day) they are able to stay in the vegetative state for extended time periods.

Once clones have been established within their veg state, they are able to begin flowering immediately, but should ultimately be grown out in order to increase root mass and begin advanced life stages. Root growth is at its strongest during the veg state, so it is best to ensure maximum growth in the clones before moving on.

The flowering phase is started by transitioning the plant's light exposure from the 18+ hours per day they're used to in the veg state to 12 hours on/12 hours off. That gives the plant the illusion of it being "fall" and they need to produce before winter comes. At this point the plant will begin to extend out and try to catch pollen (which it won't find within the cultivation center).

When that happens, it's called Sensimillia, which is a term given to unpollinated marijuana – which is a grower's ultimate goal.

Harvest time is the last stage and is as important, if not more important than the other stages. This is where you will cut the stalks of the matured buds from the plant itself and begin drying/curing the matured flower so it will become consumable through inhalation, extraction and any other means. Harvesting matured flower at the right time is key; if you harvest too early before the trichomes can become fully developed, the plant loses its potency – on the same hand if you wait too long, the plant will also lose its potency. It is key to ensure harvest is done at the right time to ensure maximum potency.

As previously stated, drying/curing is the final phase before the marijuana is able to be consumed. Once you cut the stalks of the plant, the stalks will then be hung to dry in an air-tight, enclosed area. After roughly 5-7 days, the stalks can be removed and then manicured some more to cut away any excess leaves and ensure only the bud remains. This ends the drying phase and all that's left is curing. That happens when the dried buds are placed into different air-tight containers, allowing the remaining moisture to be distributed evenly throughout and not just on the exterior of the bud. This process usually takes between 4-8 weeks and once complete, the flower is ready for sale.

12.0 Inventory Control

The Commonwealth of Massachusetts has mandated all marijuana facilities be equipped with "seed to sale tracking" systems in order to keep track of all inventory grown, stored and sold within the industry and ensure no diversion, theft or any other means takes place. This state-wide mandate had been made easier by software companies who have developed technology to make the process simple and seamless.

We will be using this software to keep track of all inventory records within the company. Each individual plant will be tagged and tracked from its entire grow cycle (seed, veg, bud, flower and harvest) through sale. Each transaction will be properly documented, tracked and then subsequently stored in our records for future reference.

In addition to “seed to sale tracking” software, N.A.P. will also implement a number of other incident reporting forms, documentation software and other programs that will interface with each other in order to better track, record, document and store all our inventory and records for inventory. We will ensure all transactions are trackable, transparent and honest.

13.0 Compliance Checklists

The Massachusetts Cannabis Control Commission has set forth a number of guidelines and regulations that need to be abided by at all times. We have looked at those regulations along with our legal team and together have comprised a list of compliance checklists and company guidelines to ensure all of our employees are trained and managed to be compliant with all guidelines at all times. We have combed through 935 CMR 500.000 and used the legal wording in that document to create our checklists to ensure maximum effectiveness.

In order for us to maintain order, compliance and efficiency, all workflow and daily activities must be properly documented in order to ensure we are within all mandated regulations. For example, if it is mandated that at all times of harvest there must be a member of the executive staff present, on our checklist for our harvest there will be a spot for that particular manager to both sign in/out as well as initial next to final amounts with dates and times present for all weighing.

14.0 Security Plan

Natural Agricultural Products, LLC will work to establish and adhere to a strict security protocol which will conform to, if not exceed all mandated regulations and guidelines. If needed, in addition to our established security measures we will provide additional security if voiced by the public, municipality, state or any other governing body.

Due to federal law, we are currently prohibited from having armed security inside our facilities. However, we will have outside security companies present for all busy periods as well as anytime a cash shipment is being processed for delivery at any of our facilities.

We will have all drivers equipped with GPS tracking devices as well as two (2) forms of separate communications. All facilities will be built out with the most state-of-the-art security cameras, motion sensors, alarms, key cards, window breaking systems, cash registers, safes, and all other equipment and security devices installed within our company.

Ecological Health Plan

"True Living Organics" is the only true methodology that adds back to the soil leaving it more fertile with every usage. The dispensary team shall apply TLO in order to increase microbial life and nutrient profile within the soil, which not only increases plant health and product efficacy, but also can enrich the land around and within the community as it is recycled.

Sustainable Energy Plan

In addition to the steps presented in the climate plan, the dispensary team will strive to achieve maximum efficiency and reach maximum genetic potential for all crops produced within the dispensary facility. Current agricultural practices that include high doses of chemical fertilizers and chemical pesticides actually only allow plants to produce 20% of their genetic potential. By using advanced organic techniques, plants can achieve 80-90% of their genetic potential thus decreasing energy expenditure through efficiency by 300%.

Energy Efficient Lighting Plan

The newest technology will be used throughout the dispensary to ensure that all lamps used in the propagation and growth of cannabis are the most efficient to date. Ongoing research and development on lighting technology will allow the staff to switch to more efficient lighting means as they become available. The efficiency of lighting technologies shall be measured in grams of cannabis produced per watt and the amount of cannabinoids per gram.

Use of interior and exterior lighting will be on an as-needed basis. Exterior lights shall only be used between dusk and dawn. Interior lighting shall only be used not more than two (2) hour before opening and not more than two (2) hours before closing, at which time only areas where work is permitted will be lit.

Water Plan

Facility procedures utilizing water will be created with conservation in mind.

- Smart Filtration

Water filtration is necessary in commercial agriculture to avoid contaminants often found in normal tap water. Such contaminants can destroy microbial life and defeat the purpose of following an organically grown cultivation regimen. All water within the dispensary will be tested and only filtered as needed. When water filtration is necessary, it will be done with the newest filtration technologies that produce minimal wastewater.

- Re-capturing

In addition to smart filtration, the dispensary will use an advanced series of pumps and filters to recapture and re-use all water collected within the facility through the HVAC system and de-humidification processes.

- Wastewater

Our gardening requires minimal run-off from the watering of plants and little to no additional nutrient needs to be added to the water. All water that does run off from daily watering practices can be captured and filtered along with any water used for cleaning within the facility.

Reduced Waste Plans

Plans to reduce waste throughout the facility will be accomplished by recycling and reuse whenever possible. The bulk of waste within the facility will be from used soil and green waste. All soil within the facility will be composted and reused as TLO soil just keeps getting better, and recycling soil is not only better for the environment, but will actually help the cultivation team to achieve maximum genetic potential and efficacy. Composting green waste will also greatly reduce the amount of landfill generated within the facility and produce quality

compost that will be used to inoculate soil with microbial life and improve the overall nutrient profile. In addition to composting, the dispensary team shall reuse everything possible through sterilization processes. All cultivation containers, tools, and other potential waste components will be cleaned and reused to their full life span in order to minimize depreciation and waste.

Employee Conservation

Team members within the cannabis-infused products facility will recycle all paper and plastic waste products. Energy efficient lights and equipment will also be utilized within the facility. We will also create programs within the organization that will encourage and reward employees for their personal conservation efforts, such as carpooling and riding a bike to work. Waste products from the facility will be composted on-site or mixed with biodegradable products for disposal.
